DECLARATION OF ACCORD 8

FOREWORD

Listed herein are designations and chemical composition limits for unalloyed aluminum registered with The Aluminum Association. The designations are assigned in accordance with the Recommendation—International Designation System for Unalloyed Aluminum. Additions may be made in accordance with the rules outlined in the Declaration of Accord.

Some of the registered designations may be the subject of patent or patent applications, and their listing herein is not to be construed in any way as the granting of a license under such patent right.

This registration record is not intended to address all regulatory requirements that may be imposed by local, national or international governing bodies. Regulatory requirements, which vary by region and end use, can further restrict the chemical composition within the registered limits. When applicable, inclusion of such requirements in the sales agreement is advised.

The following organizations are signatories to the Declaration of Accord on an International Alloy Designation System for Unalloyed Aluminum which is printed on page 8 of this publication.
