STANDARDS Australia

# Earth-moving machinery — Key-locked starting systems

AS ISO 10264:2021

This Australian Standard ® was prepared by ME-063, Earthmoving Equipment. It was approved on behalf of the Council of Standards Australia on 22 March 2021.

This Standard was published on 1 April 2021.

The following are represented on Committee ME-063:

Australian Industry Group
Better Regulation Division — SafeWork NSW
Construction and Mining Equipment Industry Group
Department of Natural Resources, Mines and Energy, Qld
Department of Regional NSW
Engineers Australia
Institute of Instrumentation, Control & Automation Australia
Minerals Council of Australia
Mining Electrical and Mining Mechanical Engineering Society
University of Queensland

This Standard was issued in draft form for comment as DR AS ISO 10264:2020.

# Preface

This Standard was prepared by the Standards Australia Committee ME-063, Earthmoving Equipment.

The objective of this document is to specify the performance requirements and the location for a key-locked starting system or other equivalent means of obviating unauthorized starting of earth-moving machinery.

It applies to all types of earth-moving machinery as defined in ISO 6165.

This document is not intended to provide protection to the authorized machine operator, nor to protect the machine against abuse, destructive vandalism, or theft.

This document is identical with, and has been reproduced from, ISO 10264:1990, *Earth-moving machinery — Key-locked starting systems*.

As this document has been reproduced from an International Standard, the following applies:

(a) In the source text "this International Standard" should read "this document".

(b) A full point substitutes for a comma when referring to a decimal marker.

Australian or Australian/New Zealand Standards that are identical adoptions of international normative references may be used interchangeably. Refer to the online catalogue for information on specific Standards.

The terms "normative" and "informative" are used in Standards to define the application of the appendices or annexes to which they apply. A "normative" appendix or annex is an integral part of a Standard, whereas an "informative" appendix or annex is only for information and guidance.
