This standard was developed by a consensus standards development process that has been accredited by the American National Standards Institute (ANSI). Accreditation by ANSI, a voluntary accreditation body representing public and private sector standards development organizations in the United States and abroad, signifies that the standards development process used by ASCE has met the ANSI requirements for openness, balance, consensus, and due process.

While ASCE's process is designed to promote standards that reflect a fair and reasoned consensus among all interested participants, while preserving the public health, safety, and welfare that is paramount to its mission, it has not made an independent assessment of and does not warrant the accuracy, completeness, suitability, or utility of any information, apparatus, product, or process discussed herein. ASCE does not intend, nor should anyone interpret, ASCE's standards to replace the sound judgment of a competent professional, having knowledge and experience in the appropriate field(s) of practice, nor to substitute for the standard of care required of such professionals in interpreting and applying the contents of this standard.

ASCE has no authority to enforce compliance with its standards and does not undertake to certify products for compliance or to render any professional services to any person or entity.

ASCE disclaims any and all liability for any personal injury, property damage, financial loss, or other damages of any nature whatsoever, including without limitation any direct, indirect, special, exemplary, or consequential damages, resulting from any person's use of, or reliance on, this standard. Any individual who relies on this standard assumes full responsibility for such use.

ASCE STANDARDS

In 2014, the Board of Direction approved revisions to the ASCE Rules for Standards Committees that govern the writing and maintenance of standards developed by ASCE. All such standards are developed by a consensus standards process managed by the ASCE Codes and Standards Committee (CSC). The consensus process includes balloting by a balanced standards committee and reviewing during a public comment period. All standards are updated or reaffirmed by the same process every five to 10 years. Requests for formal interpretations shall be processed in accordance with Section 7 of ASCE Rules for Standards Committees, which are available at www.asce.org. Errata, addenda, supplements, and interpretations, if any, for this standard can also be found at www.asce.org.

The provisions of this document are written in permissive language and, as such, offer the user a series of options or instructions but do not prescribe a specific course of action. Significant judgment is left to the user of this document.

This standard has been prepared in accordance with recognized engineering principles and should not be used without the user's competent knowledge for a given application. The publication of this standard by ASCE is not intended to warrant that the information contained herein is suitable for any general or specific use, and ASCE takes no position respecting the validity of patent rights. Users are advised that the determination of patent rights or risk of infringement is entirely their own responsibility.

A complete list of currently available standards is available in the ASCE Library (https://ascelibrary.org/page/books/s-standards).

CONTENTS

ASCE STANDARDS . . . iii

PREFACE . . . ix

ACKNOWLEDGMENTS . . . xi

1 INTRODUCTION . . . 1
- 1.1 Compaction Grouting Explained . . . 1
- 1.2 Brief History of Compaction Grouting . . . 1
- 1.3 Purpose and Development of this Guide . . . 2

2 MECHANICS OF COMPACTION GROUTING . . . 3
- 2.1 Basic Mechanics . . . 3
- 2.2 Soil Conditions . . . 4
- 2.3 Field Evidence on Compaction Grout Behavior . . . 4

3 COMPACTION GROUTING MATERIALS . . . 7
- 3.1 Introduction . . . 7
- 3.2 Factors Affecting Grout Mobility . . . 7
- 3.3 Composition . . . 8
- 3.4 Design of the Grout Mix . . . 8

4 GROUTING IN THE FIELD . . . 11
- 4.1 Methodology . . . 11
- 4.2 Equipment . . . 11
  - 4.2.1 Mixing . . . 12
  - 4.2.2 Pumps . . . 13
  - 4.2.3 Hoses and Fittings . . . 13
  - 4.2.4 Safety on Site . . . 14
  - 4.2.5 Casings . . . 14
  - 4.2.6 Headers . . . 14
  - 4.2.7 Fittings . . . 14
  - 4.2.8 Pressure Gauges . . . 15
- 4.3 Drilling . . . 15

5 SUBSURFACE INVESTIGATION FOR COMPACTION GROUTING . . . 17
- 5.1 Investigation Planning . . . 17
- 5.2 General Investigations . . . 17
  - 5.2.1 Data Review . . . 17
  - 5.2.2 Sampling . . . 18
  - 5.2.3 Investigation Limits . . . 18
  - 5.2.4 Laboratory Testing . . . 18
  - 5.2.5 Analysis and Report . . . 18
- 5.3 Investigations for Grouting Design . . . 18
  - 5.3.1 Defining the Purpose of Grouting . . . 18
  - 5.3.2 Defining the Mechanism of Grouting . . . 18
  - 5.3.3 Determining the Extent of Grouting . . . 19
  - 5.3.4 Selecting Exploration Methods . . . 19
  - 5.3.5 Logging Field Investigation . . . 20

5.3.6 Informing Field Inspectors . . . 20
5.3.7 Accommodating the Unexpected . . . 20
5.3.8 Recording and Reporting Everything . . . 20

6 DESIGN OF COMPACTION GROUTING . . . 21
6.1 Introduction . . . 21
6.2 Geometric Idealization of the Grout Mass . . . 21
6.3 Suitability of In Situ Soil for Compaction Grouting . . . 21
6.4 Pressure–Volume Behavior of In Situ Soil . . . 23
6.5 Pressure–Volume Behavior of Grout . . . 24
6.6 Pressure Losses in the Casing . . . 24
6.7 Injection Sequence . . . 24
6.8 Injection Spacing . . . 25
6.9 Estimation of Grout Quantities . . . 25
6.9.1 Densification . . . 25
6.10 Limitations on Grout Injection . . . 26
6.10.1 Soil Confinement . . . 26
6.10.2 Influence on Structures . . . 26
6.11 Refusal Measurement . . . 27
6.12 Grouting Records . . . 27

7 ANALYSIS OF COMPACTION GROUTING . . . 29
7.1 Introduction . . . 29
7.1.1 Geometric Idealization . . . 29
7.1.2 Alternative Soil Models . . . 29
7.1.3 Importance of Large Strain . . . 30
7.1.4 Simple Approach . . . 30
7.1.5 Numerical Cavity Expansion . . . 31
7.1.6 Commercial Finite-Element Codes . . . 31
7.1.7 Consolidation of the In Situ Soil during and after Grouting . . . 31
7.2 Importance of Monitoring Grout Injection . . . 33
7.3 Centrifuge Modeling . . . 33
7.4 Field Trials . . . 33
7.5 Large-Scale Laboratory Tests . . . 34

8 MONITORING DURING GROUTING . . . 35
8.1 Why Monitor? . . . 35
8.2 What to Measure . . . 35
8.3 Automatic Monitoring of Grout Injection . . . 35
8.4 Monitoring of Ground and Structure Movements . . . 37
8.4.1 Movement Detection . . . 37
8.4.2 Manual Methods . . . 37
8.4.3 Automated Movement Monitoring . . . 40
8.5 Data Processing, Presentation, and Grouting Control . . . 43
8.5.1 Expectation Setting . . . 43
8.5.2 Grouting Control during Injection . . . 43
8.5.3 Piezometric Monitoring . . . 43
8.5.4 Assessment of Grouting Protocol Based on Ground Response . . . 43

9 VERIFICATION OF GROUTING EFFECTIVENESS . . . 45
9.1 Overview of Verification Program Development . . . 45
9.2 Verification Program Planning . . . 45
9.2.1 Goals of Verification . . . 45
9.2.2 Design for Verification . . . 45
9.2.3 Test or Preconstruction Grouting . . . 45
9.2.4 Review Injection Monitoring Data . . . 45
9.3 Verification Methods . . . 46
9.3.1 Density Change Measurement . . . 46
9.3.2 Penetration Resistance . . . 46
9.3.3 Geophysical Methods (Shear Wave Velocity) . . . 47

9.3.4 Other Verification Tests . . . 49
9.3.5 Excavation/Coring . . . 49
9.4 Summary and Conclusions . . . 49

10 APPLICATIONS . . . 51
10.1 Settlement Correction . . . 51
10.1.1 Soil Improvement under Existing Structures . . . 51
10.1.2 Deep Foundations . . . 51
10.1.3 Collapsible Soils Improvement . . . 51
10.1.4 Settlement Mitigation References . . . 51
10.2 Preconstruction Soil Densification Applications . . . 51
10.2.1 Liquefaction Mitigation . . . 52
10.2.2 Soil Improvement under Proposed Structures . . . 52
10.2.3 Soft Ground Tunneling . . . 52
10.2.4 Foundations Involving Lateral Loading . . . 52
10.2.5 Preconstruction Soil Densification References . . . 52
10.3 Sinkhole Remediation . . . 52
10.4 Further Information . . . 52

APPENDIX GUIDE SPECIFICATIONS FOR COMPACTION GROUTING USING THE BOTTOM-UP SYSTEM . . . 53
