Preface

Geo-engineers and geo-scientists are increasingly confronted by new challenges in protecting and preserving our environment and infrastructure. Innovative and emerging scientific concepts and technologies are always needed to address a wide range of complex geoenvironmental issues such as groundwater protection and remediation, management of waste disposal, sustainable development and mitigation against natural and man-made geohazards.

In 1995, ASCE organized a conference on "Geoenvironment 2000: Characterization, Containment, Remediation and Performance of Environmental Geotechnics" in New Orleans, Louisiana. This conference highlighted the role of geo-professionals and the wide range of geoenvironmental engineering challenges, such as the design, construction, and monitoring of containment facilities as well as engineering mitigation of environmental geo-hazards. In 1997, ASCE organized another specialty conference on "In Situ Remediation of the Geoenvironment," in Minneapolis, Minnesota.

Due to rapid industrialization, increased environmental awareness, and the complexity of tackling past unsafe waste disposal practices; geoenvironmental engineering has continued to evolve as a discipline that bridges between engineering and basic sciences to address geo-specific environmental problems. It was imperative to organize Geocongress2008, March 9 – 12, 2008 in New Orleans, Louisiana to highlight recent advances, new directions and opportunities for sustainable engineering to protect the environment and infrastructure.

The Congress attracted a significant number of papers and more than 400 were accepted. The papers were divided into three Geotechnical Special Publications (GSPs) that capture the multidisciplinary aspects and the challenges of the sustainability of the geoenvironment.

The first GSP, *Geotechnics of Waste Management and Remediation*, tackles the challenges of sustainability in remediation and waste management, and covers topics on new and conventional remediation technologies, design and operational aspects of bioreactor landfills, innovations in design and assessment of covers and liners, management of mining wastes, and recycle and reuse of waste materials.

The second GSP, *Geosustainability and Geohazard Mitigation*, tackles the challenges of sustainability in geotechnics, and covers topics on education, sustainable materials and infrastructure, risk-based analysis and design, and impacts and mitigation of geohazards.

The third GSP, *Characterization, Monitoring and Modeling of GeoSystems*, covers mechanical and chemical soil behavior, testing, and modeling. The GSP presents innovations on subsurface characterization and monitoring, characterization of rocks, problematic Soils and waste materials; and sensor technologies. Recent developments in numerical and computational geotechnics, emerging technologies, fate and transport modeling, uncertainty modeling, and micro- and environmental geo-mechanics are also covered in this GSP.

The paper review process was managed by the editors and Paper Review Board. The review board had a very active and essential role in reviewing papers, organizing the conference sessions, and making the GSPs possible. The editors sincerely appreciate the help and patience of the Review Board. The editors also appreciate the help of Ms. Sheana Singletary of ASCE for her help in managing paper submissions and dealing with the glitches of the database.

We hope that these GSPs will serve as valuable references to all working in geoengineering.

Kaushal Joshi, Kenichi Soga, Man Yin Albert Ng, and Cedric Kechavarzi

Hydraulic Barrier Performance of SBM Cut-Off Wall Constructed by the Trench Cutting and Re-Mixing Deep Wall Method....628
Takeshi Katsumi, Masashi Kamon, Toru Inui, and Susumu Araki

Slump Evaluation of Soil-Bentonite Backfill Amended with Activated Carbon....636
Edward J. Barben, Michael A. Malusis, and Jeffrey C. Evans

Strength and Permeability of a Deep Soil Bentonite Slurry Wall....644
Christopher R. Ryan and Charles A. Spaulding

Reactive Transport in Cut-Off Walls and Implications for Wall Durability....652
Stephan A. Jefferis

Solidification and Stabilization of Contaminated Solids

Geoenvironmental Characterization to Assess Waste Stabilization/Solidification Treatment Performance and Sustainability....660
Dimitris Dermatas, Maria Chrysochoou, and Deok Hyun Moon

In-Situ Deep Soil Mixing for Solidification of Soft Estuarine Sediments—Shear Strength....668
Ali Maher, Vernon Schaefer, and David Yang

Waste Characterization by Leaching and Extraction Procedures....676
Franz G. Simon, Ute Kalbe, and Wolfgang Berger

Field Scale Characterization of Fly Ash Stabilized with Lime and FGD Gypsum....684
John L. Daniels and Gautham P. Das

Leachability of Compacted Aged and Fresh Coal Combustion Fly Ash under Hydraulic Flow Conditions....692
Mutiu G. Ayoola and Vincent O. Ogunro

Mitigation of Alkali Induced Heave in Rectorite Soil with Fly Ash....700
P. V. Sivapullaiah, P. Hari Prasad Reddy, and H. N. Ramesh

Stabilization of Inorganic Contaminants in Lead Crystal Polishing Sludge....708
Harald Weigand, Tina Gretzbach, Rupert Bäumler, and Clemens Marb

Application of Two Novel Magnesia-Based Cements in the Stabilization/Solidification of Contaminated Soils **716**
Srinath Iyengar and Abir Al-Tabbaa

Solidification/Stabilization of PCB-Contaminated Wastewater Treatment Sludges **724**
Ahmet H. Aydilek and Tuncer B. Edil

Ferrite-Induced Immobilization of Pb-Contaminated Soil and Application of Magnetic Separation **732**
Kiyoshi Omine, Hidetoshi Ochiai, Yuta Tajiri, Noriyuki Hirota, and Hidehiko Okada

The Assessment and Remediation of Chromite Ore Processing Residue at Former Disposal Sites, Glasgow, Scotland: Current Status (2007) **740**
J. G. Farmer, S. Hillier, D. G. Lumsdon, M. C. Graham, and R. J. F. Bewley

Reductive Treatment of Chromite Ore Processing Residue (COPR): Lessons from a Field Study **748**
Maria Chrysochoou, Dimitris Dermatas, Deok Hyun Moon, and Christos Christodoulatos

Advancements in the Management of Dredged Material in the State of New Jersey **756**
Douglas A. Gaffney, Edward S. Gorleski, and Genevieve Boehm Clifton

Populating a "Dredged Material" Family of Compaction Curves **764**
