Preface

Geotechnical Frontiers 2017 was held in Orlando, FL, on March 12-15. It is the third conference co-sponsored by the Industrial Fabrics Association International (IFAI) and the American Society of Civil Engineers' Geo-Institute (G-I). Other supporting organizations are acknowledged below.

The conference includes topics which illustrate that our understanding of traditional subjects, such as the physical properties of soils, the stability of slopes, the details of mechanically-stabilized earth, the design of roadways and the efficacies of geosynthetics remains far from complete. It also includes topics that reflect the dynamic and evolving nature of our industry, such as thermal properties of soils, energy geostructures, coastal engineering and measures to process coal combustion residuals.

The conference was organized with eight concurrent technical sessions over a period of three days. Most sessions are 90-minutes-long, and ideally, contain five to six presentations. These constraints limited the total number of slots that are available for paper presentations, and consequently, the total number of papers that can included in the proceedings. This is because, according to the conference rules, a paper must be presented in order to be published in the proceedings.

We received 893 abstracts for the conference. Each abstract was reviewed by the two technical session co-chairs and by at least one of the conference technical co-chairs. Of the 689 abstracts that were accepted, 583 resulted in draft manuscript submittals. Each manuscript received at least two reviews. At the end of this process, 361 manuscripts were recommended for publication in the six volumes of these proceedings. Unfortunately, the limited number of presentation slots made it necessary to decline many fine papers. We encourage the authors to submit at other venues.

Geotechnical Frontiers is also the venue for special presentations of invited and award lectures. Prof. Kerry Rowe presented the Terzaghi Lecture, Prof. Vaughan Griffiths presented the Seed Lecture, and Prof. Ning Lu presented the Peck Lecture. The inaugural Robert. M. Koerner Award and Lecture debuted at this conference and George Koerner was the speaker. There was also a special honorary symposium in recognition of the distinguished career and countless contributions of Professor Mike Duncan.

Thomas L. Brandon and Richard J. Valentine, Editors
Barbara J. Connett, Secretary General

Conference Organizing Committee

The conference organizing committee started planning in March, 2015. The individuals listed below have been actively involved in the planning and production of the conference.

Program Committee Co-Chairs
Elizabeth Dwyre, PE, DGE, Parsons Brinckerhoff, Inc.
Jorge Zornberg, PhD, PE, University of Texas at Austin

Secretary General / Event Manager
Barbara Connett, IFAI

Technical Program Co-Chairs
Thomas L. Brandon, PhD, PE, Virginia Tech
Richard J. Valentine, PE, Valentine Engineering Associates, Inc.

Conference Advisors
Jie Han, PhD, PE, University of Kansas
Robert Mackey, PE, S2L, Inc.

Exhibit Chair
Jennifer McKay, TenCate Geosynthetics

Short Course Chair
L. David Suits, North American Geosynthetics Society

Student Activities Chair
Aaron Budge, PhD, PE, GE, Minnesota State University

Student Programs Project Manager
Ashleigh Esselman, IFAI

Geo- Institute
Brad Keelor
Helen Cook

Additional Organizational Assistance

Many professional organizations contributed to the many components necessary to hold a conference like Geotechnical Frontiers 2017. These are listed below.

Supporting Organizations

Academy of Geo-Professionals (AGP)
International Association of Foundation Drilling (ADSC)
Association of Environmental and Engineering Geologists (AEG)

© ASCE

Association for Metallically Stabilized Earth (AMSE)
American Society of Civil Engineers – FL Section East Central Branch Geo-Institute (ASCE FL)
ASTM International (ASTM)
Bombay Textile Research Association (BTRA)
Business Co-ordination House (BCH)
Canadian Geotechnical Society (CGS)
Deep Foundations Institute (DFI)
Erosion Control Technology Council (ECTC)
Fabricated Geomembrane Institute (FGI)
Federal Highway Administration (FHWA)
GeoProfessional Business Association (GBA)
Geosynthetic Institute (GSI)
International Association of Geosynthetic Installers (IAGI)
The Nonwovens Institute (NWI)
Pile Driving Contractors Association (PDCA)
Transportation Research Board (TRB)
United States Universities Council on Geotechnical Education and Research (USUCGER)

Supported by
North American chapter of the International Geosynthetics Society (IGS-NA)

Under the Auspices of
International Geosynthetics Society (IGS)

Supporting Media
GeoChannel
geoengineer.org
GEOSTRATA magazine
Geosynthetics magazine
Pile Buck magazine
TechTex India

Session Co-Chairs and Paper Reviewers

Papers were reviewed by the technical session co-chairs and by a generous donation of time from volunteer reviewers. These individuals are listed below:

Technical Session Co-Chairs

Aaron Budge
Aaron Goldberg
Adrian Rodriguez-Marek
Alec Marshall
Alejandro Martinez
Allen Cadden
Amr Morsy
Angel Palomino
Anne Lemnitzer
Antonio Carraro
Arvin Farid
Ashley MacMillan

Contents

Application of Geofibers

Use of Microgrid Inclusions to Reinforce Sand 1
Jordan Vesper, Robin Wortman, Ben Leshchinsky, and T. Matthew Evans

Study of a Discrete Randomly Distributed Fiber on the Tensile Strength Improvement of Microbial-Induced Soil Stabilization 12
Lin Li, Mingdong Li, Ubani Ogbonnaya, Kejun Wen, Yingzi Xu, and Farshad Amini

The Effect of Fiber Type and Size on the Strength and Ductility of Fly Ash and Fiber Stabilized Fine-Grained Soil Subbase 19
Sazzad Bin-Shafique, Sanjoy Das Gupta, Jie Huang, and Sepehr Rezaeimalek

Optimizing Fiber Parameters Coupled with Chemical Treatment: PROMETHEE Approach 30
Arif Ali Baig Moghal, Ateekh Ur Rehman, and Bhaskar Chittoori

Reliability-Based Design Application for Fiber-Reinforced Clay.....42
Assile Abou Diab, Shadi Najjar, and Salah Sadek

Behavior of Compacted Clays

Practical Considerations for Measuring the Shear Strength of Compacted Clay 53
Daniel R. VandenBerge, J. Michael Duncan, and Thomas L. Brandon

Post-Construction Deformation of Compacted Fills Caused by Wetting.....64
Timothy D. Stark and Stephen T. Wilk

Tensile Strength of Compacted Clay between Residual Saturation and Air Entry.....72
Idil Deniz Akin and William J. Likos

Shear Strength of Remolded and Compacted Beaumont Clay 82
Mark J. Thompson and Daniel R. VandenBerge

The Use of Thermogravimetry in Quantifying the Hydration Products in Cement-Stabilized Kaolinite 92
Wassim E. Tabet, Amy B. Cerato, and Rolf Jentoft

© ASCE

Energy Geostructures

Investigation of a Small-Scale Compressed Air Energy Storage Pile as a Foundation System 103
Sihyun Kim, Junyoung Ko, Seunghee Kim, Hoyoung Seo, and Manideep Tummalapudi

Role of Thermally-Induced Buoyant Flow in Altering Energy Harvesting Using Geothermal Piles 113
Omid Ghasemi-Fare and Prasenjit Basu

Reliability-Based Geotechnical Design of Geothermal Foundations 124
Lei Wang, Nicholas Smith, Sara Khoshnevisan, Zhe Luo, and Hsein Juang

Response of Suction Caissons in Clay under Monotonic and Cyclic Horizontal Loading.....133
Jeff F. Wallace and Cassandra J. Rutherford

A Geothermal Perspective on Abandoned Oil and Gas Wells in Sedimentary Georeservoirs Located in California, USA 143
Robert Caulk and Ingrid Tomac

Long-Term Performance of Heat Exchanger Boreholes at Different Climatic Conditions 153
C. Guney Olgun, Mertcan Geyin, and Tolga Y. Ozudogru

Effect of End-Restraint Conditions on Energy Pile Behavior 165
Melis Sutman, Guney Olgun, Lyesse Laloui, and Tracy Brettmann

Soil-Concrete Interface Properties Subjected to Temperature Changes and Cycles Using Direct Shear Tests.....175
Suguang Xiao, Muhannad T. Suleiman, Rehab Elzeiny, Huan Xie, and Mohammed Al-Khawaja

Geosynthetics Research and Modeling

A Perfect Manufacturing Data Sheet from the Geomembrane Manufacturer—Does That Mean All Is Well? A Lesson Learned.....184
Anjan Kundu, Craig N. Messer, Symon Jackson, and Phillip Bennet

Soil Survey: Methodology Improvement in Brazil Adopted by CTR-RIO for the Quality Control of Geomembrane Installations.....191
Priscila M. Zidan, Luiz P. A. Frigo, and Matthew Kemnitz
