Preface

This is the first Geotechnical Special Publication of the proceedings of Grouting 2017, the Fifth International Conference on Grouting, Deep Mixing, and Diaphragm Walls held in Honolulu Hawaii, U.S.A. July 9-12, 2017. Grouting 2017 is the fifth in a series of international conferences that began in 1982 to advance the science and technology of grouting, and these proceedings represent a five-year update from the previous conference in 2012 New Orleans.

The three GSPs of these proceedings capture 1) advances in the technology of materials, instrumentation, control, and the basic science of grouting, deep mixing and diaphragm walls that will lead to new and deeper understanding, new applications, and directions for the future; 2) exciting new information on Grouting and Deep Mixing practices for monitoring and instrumentation technology that is becoming the new normal for these technologies throughout the world; and 3) new integration of multiple technologies for diaphragm wall construction and remediation.

GSP 287 focuses on Grouting Case Histories. The volume includes papers based on practical experience with drilling and grouting in specific situations such as dams, foundations, and tunnels are provided, as well as case histories on grouting in extreme environments or with special materials. Some papers explore grouting techniques as part of initial site development, and others explore grouting as a way to remediate existing problems.

These proceedings have been produced thanks to international support of numerous organizations and individuals, including the: ASCE, Geo-Institute of ASCE, US DOT FHWA, Deep Foundations Institute, and International Conference Organization for Grouting (ICOG). This publication culminates two years of effort by the planning committee whose focus has been to continue the vision established in the initial conference chaired by Wallace Hayward Baker and to keep the proceedings of this conference as the definitive source of information on the cutting edge of grouting and related technologies. Many individuals are responsible for the content of this volume, all of whom served in the efforts to maintain the standard set by previous proceedings. Papers were reviewed in accordance with ASCE GSP standards. Accordingly, each paper was subjected to technical review by two or more independent peer reviewers. Publication requires concurrence by at least two peer reviewers.

The previous four conferences held in 1982, 1992, 2003, and 2012 were organized by the Grouting Committee of the ASCE/Geo-Institute and ICOG. ICOG is an independent organization that arose from the Grouting Committee of the Geo-Institute with the purpose of promoting the continuing growth of the understanding and use of geotechnical grouting. ICOG has worked closely with the Geo-Institute in the organization of this conference and preparation of these proceedings.

Acknowledgments

The success of The Fifth International Conference on Grouting depended on numerous individuals as well as the legacy of this series of international grouting conferences, all of which have been organized by the Geo-Institute of ASCE's Grouting Technical Committee. The first international conference in 1982 was the brainchild of Wally Baker.

Thanks are due to the authors, reviewers, program committee, technical advisory committee, session chairs, moderators, sponsors, exhibitors, attendees and the ASCE conference organizing committee, notably Helen Cook and Brad Keelor.

Grouting 2017 Program Committee

Conference Chair: Michael J. Byle, P.E., D.GE, F.ASCE; Tetra Tech, Inc.
Conference Co-Chair: Lawrence F. Johnsen, P.E., D.GE, M.ASCE; GZA GeoEnvironmental, Inc.
Conference Co-Chair: Paolo Gazzarrini, P.Eng, M.ASCE; Sea to Sky Geotech Inc.
Conference Co-Chair and Workshops Co-Chair: Donald A. Bruce, Ph.D., D.GE, M.ASCE; Geosystems L.P.
Technical Program Co-Chair: Allen Cadden, P.E., D.GE, F.ASCE; Schnabel Engineering

Committee Members
Samson W. Bandimere, Aff.M.ASCE; Bandimere Grouting Consulting Services
Michael J. Miluski, P.E., M.ASCE; Compaction Grouting Services, Inc.
George K. Burke, P.E., D.GE, M.ASCE; Hayward Baker, Inc.
Joe Harris, Aff.M.ASCE; Hayward Baker, Inc.
Steve C. Maranowski, A.M.ASCE; Spartan Specialties Ltd.
Daniel Bole, A.M.ASCE; Hayward Baker, Inc.
Thomas D. Richards, Jr., P.E., D.GE, M.ASCE; Nicholson Construction Company
Justice J. Maswoswe, Ph.D., P.E., M.ASCE; FHWA Resource Center
Cumaraswamy "Vipu" Vipulanandan, Ph.D., P.E., M.ASCE; University of Houston
Chadi El Mohtar, Ph.D., A.M.ASCE; University of Texas at Austin
Reyn Shyo Hashiro, P.E., M.ASCE; Yogi Kwong Engineering LLC
Francis B. Gularte, M.ASCE; Hayward Baker, Inc.
James Warner, F.ASCE; Independent Consultant

Technical Advisory Committee
Australia — Ernst Friedlaender, *Keller Ground Engineering Pty Ltd*
Austria — Professor Scott Kieffer, *Graz University of Technology*
Brazil — Arsenio Negro, *Bureau de Projetos*
