Preface

From the early days of modern geotechnical engineering, sharing field experience on the performance of geostructures in the form of case histories has driven the advancement of knowledge for the geotechnical profession. Starting in 1984, Professor Shamsher Prakash formalized this tradition, organizing the First International Conference on Case Histories in Geotechnical Engineering. This conference brought together over 190 engineers from 38 countries to share their experiences, learn from each other, and advance the profession. By 2013, the Seventh conference in this series had grown to nearly 320 engineers attending from 53 countries spanning the globe, culminating in symposia to honor the legacy of the late Ralph B. Peck and to honor Clyde N. Baker Jr. But the essence of the conference had not changed: to advance our profession through lessons learned from case histories and shared engineering judgment.

Recognizing the significant role that case histories play in the geotechnical engineering profession, the American Society of Civil Engineers (ASCE) has decided to continue the tradition of this long-standing conference series by merging this conference into its annual Geo-Institute Congress. The result is Geo-Congress 2019: The Eighth International Conference on Case Histories in Geotechnical Engineering, which was held in Philadelphia, Pennsylvania on March 24-27, 2019.

The following pages comprise the fifth volume of ten Geotechnical Special Publications (GSPs) containing papers from Geo-Congress 2019: The Eighth International Conference on Case Histories in Geotechnical Engineering. This conference featured experiences and observations from numerous geoengineering projects and case histories, including recent "MegaProjects." Presented topics are organized into the following conference proceeding volumes:

Volume 1: Embankments, Dams, and Slopes
Volume 2: Earth Retaining Structures and Geosynthetics
Volume 3: Foundations
Volume 4: Earthquake Engineering and Soil Dynamics
Volume 5: Soil Improvement
Volume 6: Geotechnical Materials, Modeling, and Testing
Volume 7: Engineering Geology, Site Characterization, and Geophysics
Volume 8: Geoenvironmental Engineering and Sustainability
Volume 9: Soil Erosion, Underground Engineering, and Risk Assessment
Volume 10: Data, Software, Education, and a Tribute to Ralph Peck

Many individuals are responsible for the content of these published works, all of whom contributed to maintaining the high standards that are set for ASCE's GSPs. An international call for papers and rigorous peer review process yielded 403 accepted

© ASCE

technical papers, that were presented in 36 podium sessions and numerous poster sessions, in addition to the keynote award presentations, Geo-PITs (Powerful, Informative Talks), and panel sessions. Papers in these volumes were reviewed in accordance with ASCE's GSP standards, with each paper receiving two or more independent, technical peer reviews. Publication in these Proceedings required concurrence by at least two peer reviewers.

This publication series culminates two years of effort by the conference organizing committee whose focus has been to build upon and enhance the success of the past International Conferences on Case Histories in Geotechnical Engineering. On behalf of the conference organizers and the ASCE Geo-Institute, we wish to express our gratitude to all of the session chairs and reviewers for their diligent efforts to make these Proceedings a reality. We also wish to extend our thanks to Geo-Institute staff, whose tireless efforts working with authors, session chairs, and members of the conference organizing committee were instrumental in the conference planning process. Finally, we would like to thank the authors for their contributions to the Proceedings. The papers that have been submitted by our colleagues do a great service to the legacy of the previous "Case Histories in Geotechnical Engineering" conferences, and are of great value to the geotechnical engineering profession.

The Editors,

Christopher L. Meehan, Ph.D., P.E., F.ASCE, University of Delaware
Sanjeev Kumar, Ph.D., P.E., F.ASCE, Southern Illinois University Carbondale
Miguel A. Pando, Ph.D., P.Eng., M.ASCE, University of North Carolina Charlotte
Joseph T. Coe, Ph.D., M.ASCE, Temple University

Pegah Ghasemi, Atefeh Zamani, and Brina Montoya

Evaluating Shallow Mixing Protocols as Application Methods for Microbial Induced Calcite Precipitation Targeting Expansive Soil Treatment 250
Bhaskar C. S. Chittoori, Tasria Rahman, Malcolm Burbank, and Arif Ali Baig Moghal

Investigating Ammonium By-Product Removal following Stimulated Ureolytic Microbially-Induced Calcite Precipitation..... 260
Minyong Lee, Colin M. Kolbus, Andres D. Yepez, and Michael G. Gomez

Leaching Assessment of MICP-Treated Coal Combustion Products in Roadways Embankment 273
Junke Zhang, Kejun Wen, and Lin Li

Simulated Implementation Approach for Microbially Induced Carbonate Precipitation Improvement of Soil Adjacent to Piles..... 280
Jinung Do, Brina M. Montoya, and Mohammed A. Gabr

Fiber Reinforcement and Soil Stabilization

Behaviors of Expansive Soils Mixed with Polymeric Stabilizing Foams..... 289
Xijin Zhang, Xiong (Bill) Yu, Yuan Guo, and Xudong Fan

Comparative Study of Sisal and PVA Fiber for Soil Improvement 298
Anil Kumar Sharma, Swetha Prasannan, and Sreevalsa Kolathayar

Drained Triaxial Response of Clay Reinforced with Natural Hemp Fibers 305
Mohamad El Ahmad, Salah Sadek, and Shadi Najjar

Strength Characterization of Expansive Soil Treated with Phosphogypsum and Crumb Waste Rubber..... 315
R. D. Babu, K. V. N. S. Raviteja, and L. N. V. N. Varaprasad

Effect of Moulding Water Content and Dry Density on Performance of Treated Coir Fiber Reinforced BC **325**
Jairaj and M. T. Prathap Kumar

Stabilization of Expansive Soil Using Injection of Liquid Ionic Soil Stabilizer: A Case Study between Field and Laboratory Treatment **335**
Sandesh Gautam, Shi He, and Xinbao Yu

Effect of Lime Sludge, Polypropylene Fiber on Unconfined Compressive Strength and Shrinkage Behavior of Kaolinite Clay **344**
Sandeep G. Burra, Prabir K. Kolay, Sanjeev Kumar, and Vijay K. Puri

Strength Characteristics of Lime and Bottom Ash Reinforced Expansive Soils **352**
Thang Minh Le, Liet Chi Dang, and Hadi Khabbaz

Tri-Axial Behaviour of Steel Fiber-Reinforced Sand **363**
J. N. Jha, A. K. Choudhary, S. K. Shukla, and K. S. Gill
