Preface

This is the first volume of four Geotechnical Special Publications (GSPs) containing papers from Geo-Risk 2023: Advances in Theory and Innovation in Practice, held in Arlington, Virginia on July 23–26, 2023. The Geo-Risk conference series is a one-of-a-kind event that attracts attendees from around the world to witness the major advancements in the growing fields of risk and reliability in geotechnical engineering. Geo-Risk 2023 is the third successful specialty conference offered by the Risk Assessment and Management Committee of the ASCE Geo-Institute. Geo-Risk 2011, held in Atlanta, covered risk assessment and management in all fields of geoengineering while Geo-Risk 2017, held in Denver, featured Geotechnical Risk: From Theory to Practice. Georisk 2023 provided an international forum to discuss the giant strides made in the past decade by geotechnical practitioners and researchers in the fields of uncertainty modeling, geohazard mitigation, digitalization, data science, infrastructure resilience, and artificial intelligence. The conference was attended by a wide range of geo-professionals including engineers, contractors, academicians, numerical geo-technologists, researchers, and software developers.

This volume, which focuses on uncertainty and risk due to geohazards and climate change, culminates two years of effort by the technical planning committee whose focus has been to continue the success of the previous meetings in the Geo-Risk conference series. Many individuals were responsible for the content of this volume, all of whom served in the efforts to maintain the standard set by previous proceedings. For Geo-Risk 2023, an international call for papers and a rigorous peer review process yielded 163 accepted technical papers, that were presented in 19 sessions. This volume includes 33 papers that were presented in 4 technical sessions. Papers were reviewed in accordance with ASCE GSP standards. Accordingly, each paper was subjected to technical review by two or more independent peer reviewers. Publication requires concurrence by at least two peer reviewers.

The Editors would like to express their appreciation for having been provided the opportunity to be a part of Geo-Risk 2023 organization. We express our sincere thanks to the numerous session chairs and reviewers, and we hope that these proceedings will be of use to the geotechnical engineering community for many years to come.

The Editors,

Jianye Ching, Ph.D., M.ASCE, National Taiwan University
Shadi Najjar, Ph.D., M.ASCE, American University of Beirut
Lei Wang, Ph.D., M.ASCE, University of Cincinnati

Acknowledgments

Thanks are due to the authors, primary reviewers, session chairs, and program committee, without whom this publication would not be possible.

Geo-Risk 2023 Conference Program Committee

Conference Co-Chairs
Shadi Najjar, Ph.D., M.ASCE, American University of Beirut;
Limin Zhang, Ph.D., F.ASCE, Hong Kong University of Science and Technology
Robert Gilbert, Ph.D., P.E., D.GE, M.ASCE., NAE, University of Texas at Austin

Technical Program Committee
Chair: Jianye Ching, Ph.D., C.Eng, M.ASCE, National Taiwan University
Co-Chair: Zenon Medina Cetina, Ph.D., M.ASCE, Texas A&M University
Co-Chair: Lei Wang, Ph.D., P.E., M.ASCE. University of the District of Columbia
Sara Khoshnevisan, Ph.D., M.ASCE, University of Cincinnati
Jie Zhang, Ph.D., M.ASCE, Tongji University

Program Committee Members (I have sorted alphabetically)
Vaughan Griffiths, Ph.D., D.Sc, P.E., D. GE, F.ASCE, Colorado School of Mines
Lizan N. Gilbert, P.E., M.ASCE, Kiewit
Jinsong Huang, Ph.D., M.ASCE, University of Newcastle
Andy Leung, Ph.D., P.E., M. ASCE, Hong Kong Polytechnic University
Kimberly Martin, Ph.D., P.E., M.ASCE, Keller
Iason Papaioannou, Ph.D., TU München
Adrian Rodriguez-Marek, Ph.D., M. ASCE, Virginia Tech
Timo Schweckendiek, Ph.D., Deltares/TU Delft

Proceedings Editors
Jianye Ching, Ph.D., M.ASCE, National Taiwan University
Shadi Najjar, Ph.D., M.ASCE, American University of Beirut
Lei Wang, Ph.D., M.ASCE, University of Cincinnati

Geo-Risk 2023 Session Chairs

Andy Boeckmann, Dan Brown and Associates
Zijun Cao, Southwest Jiaotong University, Wuhan University
Jinbo Chen, Shell
Jianye Ching, National Taiwan University
Tang Chong, National University of Singapore
Derrick Dasenbrock, Federal Highway Administration
Assile Abou Diab, WSP
Jia-Jyun Dong, National Central University
Alexander Filotti, Deep Foundations Institute

Contents

Georisk in Climate Change, Sustainability, and Decarbonization

Assessing and Mitigating Flood Risk in United States Diplomatic Missions with High Settlement Susceptibility 1
Corrie Campbell, David Keller, Noelle Trent, and Julian Mancini

Storm-Based Forecasting of Natural Terrain Landslides 11
Te Xiao and Li-Min Zhang

Uncertainty-Based Climate-Adaptive Design Optimization of Embedded Footing 20
Vahidreza Mahmoudabadi and Nadarajah Ravichandran

River Damming Threats by Climate-Driven Glacier Detachments 32
Ruochen Jiang, Limin Zhang, and Wenjun Lu

Prediction of Landslide Dam Formation Using Machine Learning Techniques 41
Shihao Xiao, Limin Zhang, Te Xiao, and Ruochen Jiang

A Unified Framework of Vulnerability Assessment for Valley-Crossing Bridges Exposed to Compounding Mountain Geohazards 49
Wenjun Lu, Limin Zhang, and Ruochen Jiang

Risk of River Blockage Induced by Debris Flows 59
Xin He, Limin Zhang, and Wenjun Lu

Numerical Simulation of Post-Fire Debris Flow Hazards Using a Triggering-Propagation Model 67
L. Gao and L. M. Zhang

Calibrating Subseasonal to Seasonal Precipitation Forecasts to Improve Predictive Performance 75
Zeqing Huang, Qirong Ding, and Tongtiegang Zhao

A Bayesian Forecast Framework for Climatic Parameters in Geotechnical Modeling 88
Austin H. Olaiz, Claudia E. Zapata, and Yasser Soltanpour

A Comparative Study on the Vulnerability of Metro Network Efficiency: New York City, Shanghai, and Jinan 98
Hao Bai, Dongming Zhang, Jinhua Shang, Hongwei Huang, Bilal Ayyub, and Changzheng Shao

© ASCE

The Effect of Initial Ice Content on the Dynamics of Glacial Debris Flow Revealed from Multi-Phase Modeling.....107
Tengfei Wang, Ping Shen, and Dalei Peng

An Apparatus to Monitor Suction Evolution and Water Migration within a Soil Mass for Climate-Adaptive Infrastructure.....117
Aditi Rana, Ashwani Kumar Sharma, Ashutosh Kumar, Arash Azizi, Sravan Muguda, Ashraf Osman, and David G. Toll

Stability of Moraine Deposits under Changing Climate on the Tibetan Plateau 127
Taosheng Huang and Ping Shen

Probability Density Function of Geometrical Properties of Soil Desiccation Cracks at Different Relative Humidity Levels.....137
Ali Vafaei, Farshid Vahedifard, Amin Amirlatifi, and Chao-Sheng Tang

Identifying and Predicting Potential Failure Zones in Unlined Flood Control Channels Using Geospatially Related Data and Numerical Analysis 147
Justin R. Lindeman and Elijah Zane

Analyses of Frost Susceptible Flexible Pavement Adaption for Climate Change 156
Yusheng Jiang, Shafi Ullah, Xudong Fan, Claudia E. Zapata, and Xiong (Bill) Yu

Probabilistic Analyses for Seismic Hazards

Probabilistic Seismic Hazard Assessment of Red Sea State, Eastern Sudan 166
Mohammed Al-Ajamee

Regional Dependence of Strong Ground Motion in the Chilean Subduction Zone 175
Gonzalo A. Montalva, Jorge Basualto, Esteban Sáez, Gonzalo Yáñez, and Nicolás Bastías

Development of a Site Response and Hazard Model for the US Atlantic and Gulf Coastal Plains 184
Cassie V. Gann-Phillips, Ashly Cabas, Chris H. Cramer, Zachary M. Militello, and James Kaklamanos

Estimation of Seismic Intensities Based on the Spatial Distribution of Asperities in Megathrust Earthquakes.....194
José Tomás Drápela, Gonzalo Montalva, Alexandra Quiroga, and Marcos Moreno

© ASCE

Evaluating the Performance of Non-Ergodic Ground Motion Models in the Ridgecrest Area 203
Jorge Macedo, Chenying Liu, and Albert Kottke

Numerical Modelling of Kinematic Megathrust Rupture for Seismic Hazard Assessment in the Near-Source Regions 214
Diego R. Cárdenas and Gonzalo A. Montalva

Modeling the Spatial Correlation of Systematic Source Effects in Non-Ergodic Ground Motion Models for the Ridgecrest Area 223
Chenying Liu and Jorge Macedo

A Tool to Evaluate Deformation from Seismically Induced Landslides in the San Francisco Bay Area for System-Wide Risk Analyses 234
Adam Wade, Michael Greenfield, Jennifer Wilson, Christopher Hitchcock, Albert Kottke, Michael Boone, Ben Leshchinsky, and Joseph Wartman

Uncertainty and Risk Characterization of Liquefaction

Evaluation of Liquefaction Probability of Earth-Fill Dam over Next 50 Years Using Geostatistical Method Based on CPTU 244
Kazunari Imaide and Shin-Ichi Nishimura

Variability Quantification of LEAP 2017 Experiments 254
Nithyagopal Goswami and Mourad Zeghal

Development of Hazard Map for the Risk of Exceeding the Intolerable Liquefaction-Induced Settlement for a Power Transmission and Distribution System in Portland, Oregon 263
Michelle Deng, King Chin, and Melanie Walling

Uncertainty Characterization of Surface Lateral Displacement of LEAP 2020 Experimental Data 277
Alejandro Sepulveda and Mourad Zeghal

A Tool to Evaluate Liquefaction and Resulting Permanent Ground Deformation in the San Francisco Bay Area 285
Michael W. Greenfield, Michelle Guckenheimer, Adam Wade, Jennifer M. Wilson, Christopher Hitchcock, Albert R. Kottke, and Michael Boone

Uncertainty in Liquefaction-Induced Settlement in Numerical Simulations due to Model Calibration 296
Devdeep Basu, Jack Montgomery, and Armin W. Stuedlein

© ASCE

Liquefaction Hazard Assessment of Kathmandu Valley Using Deterministic and Probabilistic Approaches 307
Indra Prasad Acharya, Mandip Subedi, and Rajan KC

SSHAC Evaluation of the Seismic Fragility for an Embankment Dam 318
Martin W. McCann Jr., Zach Ruby, Michael Beaty, Thomas Westover, Gonzalo Castro, and Leslie Harder
