# Manhole Inspection and Rehabilitation

## Other Titles of Interest

***Design of Close-Fit Liners for the Rehabilitation of Gravity Pipes***, edited by Norman E. "Ed" Kampbell and Jadranka Simicevic. (ASCE/UESI 2021). MOP 145 provides a comprehensive explanation of the design of flexible, close-fit linings for the renewal or rehabilitation of pipes designed for gravity flow such as sanitary sewers, culverts, and storm sewers. (ISBN 978-0-7844-1580-1)

***Design of Water Resource Recovery Facilities***, by the Water Environment Federation (WEF) and ASCE. (ASCE/WEF 2017). This globally renowned publication is the principal reference for contemporary plant design practices of wastewater engineering professionals, augmented by performance information from operating facilities. (ISBN 978-1-260-03118-8)

***Gravity Sanitary Sewer Design and Construction, Second Edition***, edited by Paul Bizier. (ASCE/EWRI/WEF 2007). ASCE MOP 60 and WEF MOP FD-5 provides theoretical and practical guidelines for the design and construction of gravity sanitary sewers. (ISBN 978-0-7844-0900-8)

***Renewal of Potable Water Pipes***, by the Pipeline Infrastructure Committee; edited by Mohammad Najafi and Mario Perez (ASCE/Pipelines Division 2016). MOP 132 provides a detailed resource on planning, design, and construction using trenchless rehabilitation technologies for pipelines carrying drinking water. (ISBN 978-0-7844-1374-6)

***Water Pipeline Condition Assessment***, by the Task Committee on Water Pipeline Condition Assessment; edited by George F. Ruchti, Jr. (ASCE/UESI 2017). MOP 134 provides water utilities with an appropriate path for adequately determining the structural status of an individual transmission pipeline or pipeline system. (ISBN 978-0-7844-1475-0)

**Library of Congress Cataloging-in-Publication Data**

Names: Carroll, Joanne B., editor. | American Society of Civil Engineers. Committee on Manhole Rehabilitation.
Title: Manhole inspection and rehabilitation, mop 92 / Sponsored by the Manhole Inspection and Rehabilitation Task Committee of the Pipelines Infrastructure Committee of the Pipeline Division of the Utility Engineering and Surveying Institute of the American Society of Civil Engineers in partnership with the Manhole Rehabilitation Committee of NASSCO, Inc.; edited by Joanne Carroll.
Description: Third edition. | Reston : American Society of Civil Engineers, 2023. | Includes bibliographical references and index. | Summary: "Manhole Inspection and Rehabilitation, MOP 92, Third Edition, provides a valuable update to reflect current and complete inspection, as well as grading protocol that offers logical step-by-step guidance for maintaining and improving the longevity of manhole systems"-- Provided by publisher.
Identifiers: LCCN 2022041614 | ISBN 9780784416099 (paperback) | ISBN 9780784484524 (pdf) | ISBN 9780784484531 (epub)
Subjects: LCSH: Manholes--Inspection. | Manholes--Maintenance and repair.
Classification: LCC TD696 .M36 2023 | DDC 628/.25--dc23/eng/20221011

# MANUALS AND REPORTS ON ENGINEERING PRACTICE

(As developed by the ASCE Technical Procedures Committee, July 1930, and revised March 1935, February 1962, and April 1982)

A manual or report in this series consists of an orderly presentation of facts on a particular subject, supplemented by an analysis of limitations and applications of these facts. It contains information useful to the average engineer in his or her everyday work, rather than findings that may be useful only occasionally or rarely. It is not in any sense a "standard," however, nor is it so elementary or so conclusive as to provide a "rule of thumb" for nonengineers.

Furthermore, material in this series, in distinction from a paper (which expresses only one person's observations or opinions), is the work of a committee or group selected to assemble and express information on a specific topic. As often as practicable, the committee is under the direction of one or more of the Technical Divisions and Councils, and the product evolved has been subjected to review by the Executive Committee of the Division or Council. As a step in the process of this review, proposed manuscripts are often brought before the members of the Technical Divisions and Councils for comment, which may serve as the basis for improvement. When published, each manual shows the names of the committees by which it was compiled and indicates clearly the several processes through which it has passed in review, so that its merit may be definitely understood.

In February 1962 (and revised in April 1982), the Board of Direction voted to establish a series titled "Manuals and Reports on Engineering Practice" to include the manuals published and authorized to date, future Manuals of Professional Practice, and Reports on Engineering Practice. All such manual or report material of the Society would have been refereed in a manner approved by the Board Committee on Publications and would be bound, with applicable discussion, in books similar to past manuals. Numbering would be consecutive and would be a continuation of present manual numbers. In some cases of joint committee reports, bypassing of journal publications may be authorized.

*A list of available Manuals of Practice can be found at http://www.asce.org/bookstore.*

# CONTENTS

**FOREWORD** ..... **xi**

**1. INTRODUCTION** ..... **1**
References ..... 3

**2. WORKER SAFETY** ..... **5**
Potential Hazards ..... 6
Project Safety Assessment ..... 6
Traffic ..... 6
Equipment and Materials ..... 7
Personal Protection ..... 7
Confined Space Entry ..... 8
References ..... 10

**3. INSPECTION** ..... **11**
Manhole Components ..... 13
Mapping ..... 15
Condition Evaluation ..... 19
Structural Degradation ..... 23
Movement and Displacement ..... 23
