ASME A112.19.2-2024/CSA B45.1:24

Ceramic plumbing fixtures

Legal Notice for Harmonized Standard Jointly Developed by ASME and CSA Group

Intellectual property rights and ownership

As between American Society of Mechanical Engineers ("ASME") and Canadian Standards Association (Operating as "CSA Group") (collectively "ASME and CSA Group") and the users of this document (whether it be in printed or electronic form), ASME and CSA Group are the joint owners of all works contained herein that are protected by copyright, all trade-marks (except as otherwise noted to the contrary), and all inventions and trade secrets that may be contained in this document, whether or not such inventions and trade secrets are protected by patents and applications for patents. The unauthorized use, modification, copying, or disclosure of this document may violate laws that protect the intellectual property of ASME and CSA Group and may give rise to a right in ASME and CSA Group to seek legal redress for such use, modification, copying, or disclosure. ASME and CSA Group reserve all intellectual property rights in this document.

Disclaimer and exclusion of liability

This document is provided without any representations, warranties, or conditions of any kind, express or implied, including, without limitation, implied warranties or conditions concerning this document's fitness for a particular purpose or use, its merchantability, or its non-infringement of any third party's intellectual property rights. ASME and CSA Group do not warrant the accuracy, completeness, or currency of any of the information published in this document. ASME and CSA Group make no representations or warranties regarding this document's compliance with any applicable statute, rule, or regulation.

IN NO EVENT SHALL ASME AND CSA GROUP, THEIR RESPECTIVE VOLUNTEERS, MEMBERS, SUBSIDIARIES, OR AFFILIATED COMPANIES, OR THEIR EMPLOYEES, DIRECTORS, OR OFFICERS, BE LIABLE FOR ANY DIRECT, INDIRECT, OR INCIDENTAL DAMAGES, INJURY, LOSS, COSTS, OR EXPENSES, HOWSOEVER CAUSED, INCLUDING BUT NOT LIMITED TO SPECIAL OR CONSEQUENTIAL DAMAGES, LOST REVENUE, BUSINESS INTERRUPTION, LOST OR DAMAGED DATA, OR ANY OTHER COMMERCIAL OR ECONOMIC LOSS, WHETHER BASED IN CONTRACT, TORT (INCLUDING NEGLIGENCE), OR ANY OTHER THEORY OF LIABILITY, ARISING OUT OF OR RESULTING FROM ACCESS TO OR POSSESSION OR USE OF THIS DOCUMENT, EVEN IF ASME OR CSA GROUP HAVE BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES, INJURY, LOSS, COSTS, OR EXPENSES.

In publishing and making this document available, ASME and CSA Group are not undertaking to render professional or other services for or on behalf of any person or entity or to perform any duty owed by any person or entity to another person or entity. The information in this document is directed to those who have the appropriate degree of experience to use and apply its contents, and ASME and CSA Group accept no responsibility whatsoever arising in any way from any and all use of or reliance on the information contained in this document.

ASME and CSA Group have no power, nor do they undertake, to enforce compliance with the contents of the standards or other documents they jointly publish.

Authorized use of this document

This document is being provided by ASME and CSA Group for informational and non-commercial use only. The user of this document is authorized to do only the following:

If this document is in electronic form:

- load this document onto a computer for the sole purpose of reviewing it;
- search and browse this document; and
- print this document if it is in PDF format.

Limited copies of this document in print or paper form may be distributed only to persons who are authorized by ASME and CSA Group to have such copies, and only if this Legal Notice appears on each such copy.

In addition, users may not and may not permit others to

- alter this document in any way or remove this Legal Notice from the attached standard;
- sell this document without authorization from ASME and CSA Group; or
- make an electronic copy of this document.

If you do not agree with any of the terms and conditions contained in this Legal Notice, you may not load or use this document or make any copies of the contents hereof, and if you do make such copies, you are required to destroy them immediately. Use of this document constitutes your acceptance of the terms and conditions of this Legal Notice.

Visit CSA Group's policy on privacy at www.csagroup.org/legal to find out how we protect your personal information.

Canadian Standards Association (operating as "CSA Group"), under whose auspices this National Standard has been produced, was chartered in 1919 and accredited by the Standards Council of Canada to the National Standards system in 1973. It is a not-for-profit, nonstatutory, voluntary membership association engaged in standards development and certification activities.

CSA Group standards reflect a national consensus of producers and users — including manufacturers, consumers, retailers, unions and professional organizations, and governmental agencies. The standards are used widely by industry and commerce and often adopted by municipal, provincial, and federal governments in their regulations, particularly in the fields of health, safety, building and construction, and the environment.

More than 10 000 members indicate their support for CSA Group's standards development by volunteering their time and skills to Committee work.

CSA Group offers certification and testing services in support of and as an extension to its standards development activities. To ensure the integrity of its certification process, CSA Group regularly and continually audits and inspects products that bear the CSA Group Mark.

In addition to its head office and laboratory complex in Toronto, CSA Group has regional branch offices in major centres across Canada and inspection and testing agencies in fourteen countries. Since 1919, CSA Group has developed the necessary expertise to meet its corporate mission: CSA Group is an independent service organization whose mission is to provide an open and effective forum for activities facilitating the exchange of goods and services through the use of standards, certification and related services to meet national and international needs.

For further information on CSA Group services, write to

Canada

A National Standard of Canada is a standard developed by a Standards Council of Canada (SCC) accredited Standards Development Organization, in compliance with requirements and guidance set out by SCC. More information on National Standards of Canada can be found at www.scc.ca.

SCC is a Crown corporation within the portfolio of Innovation, Science and Economic Development (ISED) Canada. With the goal of enhancing Canada's economic competitiveness and social wellbeing, SCC leads and facilitates the development and use of national and international standards. SCC also coordinates Canadian participation in standards development, and identifies strategies to advance Canadian standardization efforts.

Accreditation services are provided by SCC to various customers, including product certifiers, testing laboratories, and standards development organizations. A list of SCC programs and accredited bodies is publicly available at www.scc.ca.

Preface 20

1 Scope 22
1.1 Inclusions 22
1.2 Terminology 22
1.3 Units 23

2 Reference publications 23

3 Definitions and abbreviations 24
3.1 Definitions 24
3.2 Abbreviations 28

4 General requirements 29
4.1 Dimensions and tolerances 29
4.1.1 Thickness 29
4.1.2 Tolerances 29
4.2 Glazing 29
4.3 Waste fitting openings, drainage, and overflows 30
4.3.1 Openings and drainage 30
4.3.2 Overflows 30
4.4 Off-the-floor plumbing fixture supports 30
4.5 Non-vitreous china plumbing fixtures 31
4.5.1 Glazing 31
4.5.2 Integral traps 31
4.6 Additional requirements for water closets 31
4.6.1 Outlet dimensions 31
4.6.2 Non-standard outlets 31
4.6.3 Bolt hole spacing 31
4.6.4 Roughing-in details 31
4.6.5 Seat-mounting holes 31
4.6.6 Rim profiles 31
4.6.7 Water surface dimensions 31
4.6.8 Trap diameter 31
4.6.9 Spuds 32
4.6.10 Rim heights 32
4.7 Additional requirements for urinals 32
4.7.1 Integral trap diameter 32
4.7.2 Dimensions 32
4.7.3 Spuds 32
4.7.4 Materials and construction 32

4.7.5 Non-water-consuming urinals *32*
4.8 Additional requirements for lavatories, sinks, and bidets *32*
4.8.1 Openings and mounting surfaces for supply fittings *32*
4.8.2 Wall-mounted commercial lavatories and sinks *33*
4.8.3 Spuds for clinic sinks *33*
4.9 Additional requirements for bathtubs and shower bases *33*
4.9.1 Minimum dimensions for bathtubs *33*
4.9.2 Slope to the waste outlet *33*
4.9.3 Flanges *33*
4.9.4 Supply fittings *34*
4.10 Additional requirements for drinking fountains *34*
4.10.1 General *34*
4.10.2 Supply fittings *34*
4.11 Accessible design fixtures *34*

5 Flushing devices used with fixtures *34*
5.1 General *34*
5.1.1 Hydraulic performance *34*
5.1.2 Air gaps, vacuum breakers, or backflow preventers *35*
5.2 Gravity flush tanks *35*
5.2.1 General *35*
5.2.2 Fill valve opening diameter and location *35*
5.2.3 Critical level *35*
5.2.4 Low-profile gravity tanks *35*
5.2.5 Water closet fill valve *35*
5.2.6 Water closet tank capacity *35*
5.3 Pressurized flushing devices *35*
5.3.1 General *35*
5.3.2 Low-profile tanks with pressurized flushing devices *35*
5.4 Plastic water closet tanks *36*
5.5 Electrical components of electro-hydraulic water closets *36*
5.5.1 Pump motor and impeller *36*
5.5.2 Jet hose *36*
5.5.3 Electrical supply cords *36*
5.5.4 Wiring harnesses and electrical controls *36*
5.6 Dual-flush water closets *36*
5.6.1 General *36*
5.6.2 Operation *36*

6 Tests — Materials, finishes, structural integrity, and seals *36*
6.1 Water absorption test *37*
6.1.1 Test specimen *37*
6.1.2 Specimen preparation *37*
6.1.3 Procedure *37*
6.1.4 Report *37*
6.1.5 Performance *37*
6.2 Crazing test *37*
6.2.1 Test specimen *37*
6.2.2 Procedure *38*

6.2.3 Performance *38*
6.3 Surface examination *38*
6.3.1 Procedure *38*
6.3.2 Evaluation *38*
6.3.3 Performance *39*
6.3.4 Other fixtures *39*
6.4 Warpage test *39*
6.4.1 Procedure *39*
6.4.2 Performance *39*
6.5 Field-installed tiling-flange seal test *39*
6.5.1 Procedure *39*
6.5.2 Performance *39*
6.6 Overflow test — Lavatories, sinks, and bidets *40*
6.6.1 Procedure *40*
6.6.2 Performance *40*
6.7 Structural integrity tests for all wall-mounted plumbing fixtures and thin-wall lavatories *40*
6.7.1 All wall-mounted fixtures and thin-wall lavatories *40*
6.7.2 Wall-mounted water closets *40*
6.7.3 Wall-mounted and thin-wall lavatories *41*
6.7.4 Wall-mounted urinals *41*
6.8 Structural integrity test for bathtubs, shower bases, and non-vitreous service sinks *41*
6.8.1 Apparatus *41*
6.8.2 Procedure *41*
6.8.3 Performance *42*
6.9 Joint seal test *42*
6.10 Auger test *42*
6.10.1 Procedure *42*
6.10.2 Performance *42*
6.11 Condensation-free (insulated) tank test *42*
6.11.1 Procedure *42*
6.11.2 Performance *42*

7 Water closet tests *42*
7.1 General *43*
7.1.1 All tests *43*
7.1.2 Gravity flush tank water closets *43*
7.1.3 Flushometer tank, electro-hydraulic, or other pressurized flushing device water closets *43*
7.1.4 Flushometer valve water closets *43*
7.1.5 Procedures for standardizing the water supply system *44*
7.1.6 Test medium *44*
7.1.7 Reports *45*
7.2 Trap seal depth determination test *45*
7.2.1 Apparatus *45*
7.2.2 Procedure *45*
7.2.3 Report *45*
7.2.4 Performance *45*
7.3 Water consumption test *45*
7.3.1 General *45*
7.3.2 Apparatus *45*

7.14 Dual-flush water closet tests *55*
7.14.1 Full flush mode *55*
7.14.2 Reduced flush mode *55*

8 Urinal tests *57*
8.1 General *57*
8.1.1 Water-consuming vs. non-water-consuming urinals *57*
8.1.2 Test pressures *57*
8.1.3 Test results *57*
8.2 Test apparatus and general instructions *57*
8.2.1 Procedure *57*
8.2.2 Urinal discharge *57*
8.2.3 Applicable test pressure(s) *57*
8.2.4 Flushing device *58*
8.2.5 Test results *58*
8.3 Trap seal depth determination test *58*
8.3.1 Apparatus *58*
8.3.2 Procedure *58*
8.3.3 Report *58*
8.3.4 Performance *58*
8.4 Surface wash test *58*
8.4.1 Test medium *58*
8.4.2 Procedure *58*
8.4.3 Report *59*
8.4.4 Performance *59*
8.5 Dye test *59*
8.5.1 Test medium and apparatus *59*
8.5.2 Procedure *59*
8.5.3 Report *59*
8.5.4 Performance *60*
8.6 Water consumption test *60*
8.6.1 Apparatus *60*
8.6.2 Procedure *60*
8.6.3 Report *60*
8.6.4 Performance *60*
8.7 Tests for non-water-consuming urinals *60*

9 Markings, packaging, and installation instructions and other literature *60*
9.1 General *60*
9.1.1 General *60*
9.1.2 Requirements *61*
9.1.3 Permanent markings and adhesive labels *61*
9.2 Non-standard fixtures *61*
9.3 Additional markings for water closets and urinals *61*
9.3.1 Close-coupled water closets *61*
9.3.2 Water consumption *61*
9.3.3 Water level mark in gravity flush tank water closets *61*
9.3.4 Water closet tank repair parts *62*
9.3.5 Dual-flush water closets *62*

Preface

This is the fourth edition of ASME A112.19.2/CSA B45.1, *Ceramic plumbing fixtures*. It supersedes the previous editions published in 2018, 2013, and 2008.

This Standard is considered suitable for use for conformity assessment within the stated scope of the Standard.

This Standard was approved by the CSA Technical Committee on Plumbing Fixtures, under the jurisdiction of the CSA Strategic Steering Committee on Construction and Civil Infrastructure and the ASME Standards Committee on Plumbing Materials and Equipment.

This Standard has been developed in compliance with Standards Council of Canada requirements for National Standards of Canada. It has been published as a National Standard of Canada by CSA Group.

This Standard has been approved by the American National Standards Institute (ANSI) as an American National Standard.

ASME Notes:

1) *The next edition of this Standard is scheduled for publication in 2029.*
2) *This standard was developed under procedures accredited as meeting the criteria for American National Standards and it is an American National Standard. The standards committee that approved the code or standard was balanced to ensure that individuals from competent and concerned interests had an opportunity to participate. The proposed standard was made available for public review and comment, which provided an opportunity for additional public input from industry, academia, regulatory agencies, and the public-at-large.*
3) *ASME does not "approve," "rate," or "endorse" any item, construction, proprietary device, or activity.*
4) *ASME does not take any position with respect to the validity of any patent rights asserted in connection with any items mentioned in this document, and does not undertake to insure anyone utilizing a standard against liability for infringement of any applicable letters patent, nor does ASME assume any such liability. Users of a standard are expressly advised that determination of the validity of any such patent rights, and the risk of infringement of such rights, is entirely their own responsibility.*
5) *Participation by federal agency representatives or persons affiliated with industry is not to be interpreted as government or industry endorsement of this standard.*
6) *ASME accepts responsibility for only those interpretations of this document issued in accordance with the established ASME procedures and policies, which precludes the issuance of interpretations by individuals.*
7) *ASME issues written replies to inquiries concerning interpretation of technical aspects of this standard. An Interpretation can be rendered only in response to a request submitted through the online Interpretation Submittal Form at http://go.asme.org/InterpretationRequest.*
   ASME procedures provide for reconsideration of any interpretation when or if additional information that might affect an interpretation is available. Further, persons aggrieved by an interpretation may appeal to the cognizant ASME committee.
   Interpretations are published in the ASME Interpretations Database at http://go.asme.org/Interpretations as they are issued.

CSA Notes:

1) *Use of the singular does not exclude the plural (and vice versa) when the sense allows.*
2) *Although the intended primary application of this Standard is stated in its Scope, it is important to note that it remains the responsibility of the users of the Standard to judge its suitability for their particular purpose.*
3) *This Standard was developed by consensus, which is defined by* CSA Policy governing standardization — Code of good practice for standardization *as "substantial agreement. Consensus implies much more than a simple majority, but not necessarily unanimity". It is consistent with this definition that a member may be included in the Technical Committee list and yet not be in full agreement with all clauses of this Standard.*
