ASME B30.7-2026

(Revision of ASME B30.7-2021)

Winches

Safety Standard for Cableways, Cranes, Derricks, Hoists, Hooks, Jacks, and Slings

AN AMERICAN NATIONAL STANDARD

The American Society of Mechanical Engineers

ASME B30.7-2026
(Revision of ASME B30.7-2021)

Winches

Safety Standard for Cableways, Cranes, Derricks, Hoists, Hooks, Jacks, and Slings

AN AMERICAN NATIONAL STANDARD

The American Society of Mechanical Engineers
Two Park Avenue • New York, NY • 10016 USA

Date of Issuance: March 27, 2026

The next edition of this Standard is scheduled for publication in 2031. This Standard will become effective 1 year after the Date of Issuance.

This code or standard was developed under procedures accredited as meeting the criteria for American National Standards. The standards committee that approved the code or standard was balanced to ensure that individuals from competent and concerned interests had an opportunity to participate. The proposed code or standard was made available for public review and comment, which provided an opportunity for additional public input from industry, academia, regulatory agencies, and the public-at-large.

ASME does not “approve,” “certify,” “rate,” or “endorse” any item, construction, proprietary device, or activity. ASME does not take any position with respect to the validity of any patent rights asserted in connection with any items mentioned in this document, and does not undertake to insure anyone utilizing a standard against liability for infringement of any applicable letters patent, nor does ASME assume any such liability. Users of a code or standard are expressly advised that determination of the validity of any such patent rights, and the risk of infringement of such rights, is entirely their own responsibility.

Participation by federal agency representatives or persons affiliated with industry is not to be interpreted as government or industry endorsement of this code or standard.

ASME accepts responsibility for only those interpretations of this document issued in accordance with the established ASME procedures and policies, which precludes the issuance of interpretations by individuals.

The endnotes and preamble in this document (if any) are part of this American National Standard.

FOREWORD

This American National Standard, Safety Standard for Cableways, Cranes, Derricks, Hoists, Hooks, Jacks, and Slings, has been developed under the procedures accredited by the American National Standards Institute (ANSI). This Standard had its beginning in December 1916, when an eight-page Code of Safety Standards for Cranes, prepared by the American Society of Mechanical Engineers (ASME) Committee on the Protection of Industrial Workers, was presented at the annual meeting of ASME.

Meetings and discussions regarding safety on cranes, derricks, and hoists were held from 1920 to 1925 involving the ASME Safety Code Correlating Committee, the Association of Iron and Steel Electrical Engineers, the American Museum of Safety, the American Engineering Standards Committee (AESC) [later changed to American Standards Association (ASA), then to the United States of America Standards Institute (USASI), and finally to ANSI], Department of Labor — State of New Jersey, Department of Labor and Industry — State of Pennsylvania, and the Locomotive Crane Manufacturers Association. On June 11, 1925, the AESC approved the ASME Safety Code Correlating Committee's recommendation and authorized the project with the U.S. Department of the Navy, Bureau of Yards and Docks, and ASME as sponsors.

In March 1926, invitations were issued to 50 organizations to appoint representatives to a Sectional Committee. The call for organization of this Sectional Committee was sent out October 2, 1926, and the Committee was organized on November 4, 1926, with 57 members representing 29 national organizations.

Commencing June 1, 1927, and using the eight-page Code published by ASME in 1916 as a basis, the Sectional Committee developed the Safety Code for Cranes, Derricks, and Hoists. The early drafts of this safety code included requirements for jacks, but, due to inputs and comments on those drafts, the Sectional Committee decided in 1938 to make the requirements for jacks a separate code. In January 1943, ASA B30.2-1943 was published addressing a multitude of equipment types, and in August 1943, ASA B30.1-1943 was published addressing only jacks. Both documents were reaffirmed in 1952 and widely accepted as safety standards.

Due to changes in design, advancement in techniques, and general interest of labor and industry in safety, the Sectional Committee, under the joint sponsorship of ASME and the Bureau of Yards and Docks (now the Naval Facilities Engineering Command), was reorganized on January 31, 1962, with 39 members representing 27 national organizations. The new Committee changed the format of ASA B30.2-1943 so that the multitude of equipment types it addressed could be published in separate volumes that could completely cover the construction, installation, inspection, testing, maintenance, and operation of each type of equipment that was included in the scope of ASA B30.2. This format change resulted in B30.3, B30.5, B30.6, B30.11, and B30.16 being designated as revisions of B30.2 with the remainder of the B30 volumes being published as totally new volumes. ASA changed its name to USASI in 1966 and to ANSI in 1969, which resulted in B30 volumes from 1943 to 1968 being designated as either ASA B30, USAS B30, or ANSI B30, depending on their date of publication.

In 1982, the Committee was reorganized as an Accredited Organization Committee operating under procedures developed by ASME and accredited by ANSI. This Standard presents a coordinated set of rules that may serve as a guide to government and other regulatory bodies and municipal authorities responsible for the guarding and inspection of the equipment falling within its scope. The suggestions leading to accident prevention are given both as mandatory and advisory provisions; compliance with both types may be required by employers of their employees.

In case of practical difficulties, new developments, or unnecessary hardship, the administrative or regulatory authority may grant variances from the literal requirements or permit the use of other devices or methods but only when it is clearly evident that an equivalent degree of protection is thereby secured. To secure uniform application and interpretation of this Standard, administrative or regulatory authorities are urged to consult the B30 Committee, in accordance with the format described on the Correspondence With the B30 Committee page, before rendering decisions on disputed points.

Safety codes and standards are intended to enhance public safety. Revisions result from committee consideration of factors such as technological advances, new data, and changing environmental and industry needs. Revisions do not imply that previous editions were inadequate.

The first edition of B30.7, entitled Base-Mounted Drum Hoists, was published in 1971. New editions were published in 1977, 1984, 1989, 1994, 2001, and 2006. In 2011, the Volume was completely rewritten, and the title was changed to Winches. The 2016 edition included changes to clarify that capstans are not part of the B30.7 scope, to make the Volume more consistent with other B30 volumes, and to add personnel competence requirements and responsibilities. The 2021 edition revised the definitions and incorporated references to ASME B30.30, among other updates.

This 2026 edition revises paras. 7-2.1.2 through 7-2.1.5 to make the Volume consistent with other B30 volumes. This Volume of the Standard, which was approved by the B30 Committee and by ASME, was approved by ANSI and designated an American National Standard on January 26, 2026.

ASME B30 COMMITTEE
Safety Standard for Cableways, Cranes, Derricks, Hoists, Hooks, Jacks, and Slings

(The following is the roster of the committee at the time of approval of this Standard.)

STANDARDS COMMITTEE OFFICERS

E. D. Fidler, *Chair*
T. Sicklesteel, *Vice Chair*
S. D. Wood, *Vice Chair*
K. Peterson, *Secretary*

STANDARDS COMMITTEE PERSONNEL

B. B. Bacon, Tennessee Valley Authority (TVA)
T. L. Blanton, OGR Consulting Services, LLC
P. A. Boeckman, The Crosby Group, LLC
D. Boyle, The Crosby Group
J. R. Burkey, Columbus McKinnon Corp.
J. A. Danielson, The Boeing Co.
D. Decker, Becket Training and Consulting
L. D. DeMark, Equipment Training Solutions, LLC
D. W. Eckstine, Eckstine & Associates, Inc.
E. D. Fidler, Grove U.S., LLC
M. Gardiner, ICC Forensics, LLC
J. A. Gilbert, JAGwire Management, LLC
D. Henninger, Bridon-Bekaert Ropes Group
M. M. Jaxtheimer, Navy Crane Center
T. W. Klein, Wireco Worldgroup, Inc.
A. J. Lusi, Jr., Lumark Consulting, LLP
T. C. Mackey, HiLine Engineering and Fabrication, Inc.
J. Mihlbauer, All Ship and Cargo Surveys, Ltd.
M. Parnell, Industrial Training International, Inc.
J. T. Perkins, All Material Handling (AMH)
K. Peterson, The American Society of Mechanical Engineers
B. Pickett, Systems Engineering and Forensic Services
J. A. Pilgrim, Manitowoc Cranes
P. Quick, Affiliated Engineering Laboratories, Inc.
S. Rammelsberg, CB&I Storage Solutions
J. M. Randall, J. E. Spear Consulting, LP
K. Rask, NationsBuilders Insurance Services, Inc.
K. Reynolds, Shell Exploration and Production
C. L. Richardson, Lone Star Rigging, LP
J. E. Richardson, Navy Crane Center
J. W. Rowland III, Consultant
A. R. Ruud, Atkinson Construction
L. K. Shapiro, Howard I. Shapiro & Associates Consulting Engineers, P.C.
T. Sicklesteel, NCCCO
C. H. Smith, Morrow Equipment Co., LLC
D. W. Smith, J. E. Spear Consulting, LP
W. J. Smith, Jr., NationsBuilders Insurance Services
R. G. Strain, Advanced Crane Technologies, LLC
J. Sturm, Sturm Corp.
D. Sullivan, IUOE Local 542 JATC
P. A. Vallejos, Hanford Mission Integration Solutions, LLC
C. Warren, Webber, LLC
J. D. Wiethorn, International Crane and Construction Safety Solutions, LLC
S. D. Wood, Terex Corp.
M. Zerba, Lampson International, LLC
M. Benavage, *Alternate,* Bridon-Bekaert Ropes Group
M. Chaudanson, *Alternate,* Howard I. Shapiro & Associates Consulting Engineers, P.C.
T. Cobb, *Alternate,* Columbus McKinnon Corp.
P. B. Debuigne, *Alternate,* Blue Origin
M. Eckstine, *Alternate,* Eckstine & Associates, Inc.
D. Freeman, *Alternate,* CB&I Storage Solutions
D. Frerking, *Alternate,* XCMG American Research Corp.
J. B. Greenwood, *Alternate,* Navy Crane Center
B. Haight, *Alternate,* Morrow Equipment Co., LLC
A. Imlah, *Alternate,* The Boeing Co.
W. J. Merrill, *Alternate,* Merrill Safety Solutions, LLC
G. D. Miller, *Alternate,* Manitowoc Cranes
D. J. Mitchell, *Alternate,* IUOE Local 542
D. Moore, *Alternate,* Unified Engineering, LP
G. M. Ray, *Alternate,* Tennessee Valley Authority (TVA)
S. Rogers, *Alternate,* Sam Rogers Crane & Rigging
N. Rossetti, *Alternate,* Advanced Crane Technologies
S. Santee, *Alternate,* Navy Crane Center
B. Schmoyer, *Alternate,* U.S. Training Consultants, LLC
J. Schober, *Alternate,* American Bridge Co.
J. E. Spear, *Alternate,* J. E. Spear Consulting, LP
J. A. Stewart, *Alternate,* Stewart Safety Consulting
D. Stott, *Alternate,* Ryskless Safety Solutions
A. Thompson, *Alternate,* Wireco Worldgroup, Inc.
W. Tubbs, *Alternate,* Craneology, Inc.
J. J. Van Egeren, *Alternate,* Manitowoc Cranes
C. Vencl, *Alternate,* Kito Crosby
N. E. Andrew, *Honorary Member,* Neil E. Andrew and Associates, LLC
J. W. Downs, Jr., *Honorary Member,* Downs Crane & Hoist Company, Inc.
J. L. Franks, *Honorary Member,* Consultant
C. W. Ireland, *Honorary Member,* National Oilwell Varco
P. Juhren, *Honorary Member,* Morrow Equipment Co., LLC
J. M. Klibert, *Honorary Member,* Lift-All Co., Inc.
R. Kohner, *Honorary Member,* Landmark Engineering Service
L. D. Means, *Honorary Member,* Retired
J. C. Ryan, *Honorary Member,* Boh Bros. Construction Co.
R. Stemp, *Honorary Member,* Lampson International, LLC

B30.7 SUBCOMMITTEE PERSONNEL

S. A. Burnett, *Chair*, Salt River Project
M. Benavage, Bridon-Bekaert Ropes Group
J. Braden, Paccar, Inc.
C. Brown, Ramsey Industries
J. C. Cantrell, Link-Belt Cranes
P. Clark, Pewag, Inc.
L. Engle, Manitowoc Cranes
B. S. Hope, Inspection and Training Solutions of America, Inc.
R. Marcotte, Bruce Power, LP
G. Peters, William Peters Gregory
D. W. Smith, J. E. Spear Consulting, LP
S. Weir, Central Plateau Cleanup Co., LLC
L. D. Means, *Contributing Member*, Means Engineering and Consulting, P.C.
M. W. Mills, *Contributing Member*, Liberty Mutual Insurance

B30 INTEREST REVIEW GROUP

O. Akinboboye, Ropetech Engineering Services
B. Dobbs, LEEA
Y. T. F. Elhola, Axess Group
A. Gomes Rocha, Industrial Training International
J. Hui, School of Civil Engineering, People's Republic of China
D. Mabelane, The South African Nuclear Energy Corp.
A. C. Mattoli, Prowinch, LLC
T. McCullough, Allegiance Crane and Equipment
C. Neth, Neth Engineering, PLLC
A. Payne, Houston City College

B30 REGULATORY AUTHORITY COUNCIL

C. N. Stribling, Jr., *Chair*, Kentucky Education and Labor Cabinet
K. Peterson, *Secretary*, The American Society of Mechanical Engineers
B. Calliari, U.S. Bureau of Reclamation
C. Frost, U.S. Department of Labor
D. E. Latham, State of Maryland DLLR
S. Sumeshwar, State of California — OSH Standards Board
T. Taylor, North Carolina Department of Labor
N. Reynolds, *Alternate*, State of Maryland — OSH Board

(26)

CORRESPONDENCE WITH THE B30 COMMITTEE

General. ASME codes and standards are developed and maintained by committees with the intent to represent the consensus of concerned interests. Users of ASME codes and standards may correspond with the committees to propose revisions or cases, report errata, or request interpretations. Correspondence for this Standard should be sent to the staff secretary noted on the committee's web page, accessible at https://go.asme.org/B30committee.

Revisions and Errata. The committee processes revisions to this Standard on a continuous basis to incorporate changes that appear necessary or desirable as demonstrated by the experience gained from the application of the Standard. Approved revisions will be published in the next edition of the Standard.

In addition, the committee may post errata on the committee web page. Errata become effective on the date posted. Users can register on the committee web page to receive email notifications of posted errata.

This Standard is always open for comment, and the committee welcomes proposals for revisions. Such proposals should be as specific as possible, citing the paragraph number, the proposed wording, and a detailed description of the reasons for the proposal, including any pertinent background information and supporting documentation.

Cases. The committee does not issue cases for this Standard.

Interpretations. Upon request, the committee will issue an interpretation of any requirement of this Standard. An interpretation can be issued only in response to a request submitted through the online Inquiry Submittal Form at https://go.asme.org/InterpretationRequest. Upon submitting the form, the inquirer will receive an automatic email confirming receipt.

ASME does not act as a consultant for specific engineering problems or for the general application or understanding of the Standard requirements. If, based on the information submitted, it is the opinion of the committee that the inquirer should seek assistance, the request will be returned with the recommendation that such assistance be obtained. Inquirers can track the status of their requests at https://go.asme.org/Interpretations.

ASME procedures provide for reconsideration of any interpretation when or if additional information that might affect an interpretation is available. Further, persons aggrieved by an interpretation may appeal to the cognizant ASME committee or subcommittee. ASME does not "approve," "certify," "rate," or "endorse" any item, construction, proprietary device, or activity.

Interpretations are published in the ASME Interpretations Database at https://go.asme.org/Interpretations as they are issued.

Committee Meetings. The B30 Standards Committee regularly holds meetings that are open to the public. Persons wishing to attend any meeting should contact the secretary of the committee. Information on future committee meetings can be found on the committee web page at https://go.asme.org/B30committee.

B30 STANDARD INTRODUCTION (26)

SECTION I: SCOPE

The ASME B30 Standard contains provisions that apply to the construction, installation, operation, inspection, testing, maintenance, and use of cranes and other lifting and material-movement-related equipment. For the convenience of the reader, the Standard has been divided into separate volumes. Each volume has been written under the direction of the ASME B30 Standards Committee and has successfully completed a consensus approval process under the general auspices of the American National Standards Institute (ANSI).

As of the date of issuance of this Volume, the B30 Standard comprises the following volumes:

B30.1 Jacks, Industrial Rollers, Air Casters, and Hydraulic Gantries

B30.2 Overhead and Gantry Cranes (Top Running Bridge, Single or Multiple Girder, Top Running Trolley Hoist)

B30.3 Tower Cranes

B30.4 Portal and Pedestal Cranes

B30.5 Mobile and Locomotive Cranes

B30.6 Derricks

B30.7 Winches

B30.8 Floating Cranes and Floating Derricks

B30.9 Slings

B30.10 Hooks

B30.11 Monorails and Underhung Cranes (withdrawn 2018 — requirements found in latest revision of B30.17)

B30.12 Handling Loads Suspended From Rotorcraft

B30.13 Storage/Retrieval (S/R) Machines and Associated Equipment

B30.14 Side Boom and Rotating Pipelayers

B30.15 Mobile Hydraulic Cranes (withdrawn 1982 — requirements found in latest revision of B30.5)

B30.16 Overhead Underhung and Stationary Hoists

B30.17 Cranes and Monorails (With Underhung Trolley or Bridge)

B30.18 Stacker Cranes (Top or Under Running Bridge, Multiple Girder With Top or Under Running Trolley Hoist)

B30.19 Cableways

B30.20 Below-the-Hook Lifting Devices

B30.21 Lever Hoists

B30.22 Articulating Boom Cranes

B30.23 Personnel Lifting Systems

B30.24 Container Cranes

B30.25 Scrap and Material Handlers

B30.26 Rigging Hardware

B30.27 Material Placement Systems

B30.28 Balance Lifting Units

B30.29 Self-Erecting Tower Cranes

B30.30 Ropes

B30.31 Self-Propelled, Towed, or Remote-Controlled Hydraulic Platform Transporters[1]

B30.32 Unmanned Aircraft Systems (UAS) Used in Inspection, Testing, Maintenance, and Load-Handling Operations

SECTION II: SCOPE EXCLUSIONS

Any exclusion of, or limitations applicable to, the equipment, requirements, recommendations, or operations contained in this Standard are established in the affected volume's scope.

SECTION III: PURPOSE

The B30 Standard is intended to

(a) prevent or minimize injury to workers, and otherwise provide for the protection of life, limb, and property by prescribing safety requirements

(b) provide direction to manufacturers, owners, employers, users, and others concerned with, or responsible for, its application

(c) guide governments and other regulatory bodies in the development, promulgation, and enforcement of appropriate safety directives

SECTION IV: USE BY REGULATORY AGENCIES

These volumes may be adopted in whole or in part for governmental or regulatory use. If adopted for governmental use, the references to other national codes and standards in the specific volumes may be changed to refer to the corresponding regulations of the governmental authorities.

[1] This volume is currently in the development process.
