CONTENTS

FOREWORD 6
1 Scope 8
2 Normative references 8
3 Abbreviations 9
4 Terminal categories 11
5 Definition of receiving conditions 12
5.1 Portable reception 12
5.2 Mobile reception 12
6 Frequencies and channel bandwidths 13
6.1 Channel frequencies 13
6.2 Supported frequency ranges 13
6.3 Supported bandwidths 14
7 DVB-T/H modes 14
7.1 Supported DVB-T/H modes 14
7.2 Change of modulation parameters 14
7.3 Tuning procedure 14
8 Transmitter performance 15
8.1 Transmitter noise-like impairments 15
8.1.1 Noise-like processes 15
8.2 Further transmitter impairments 16
8.2.1 Group delay errors 16
8.2.2 Phase noise in OFDM systems 17
8.2.3 OFDM clock frequency 17
8.3 Spectrum masks 17
8.3.1 DVB-T signals (general) 17
8.3.2 DVB-T signals (critical cases) 18
8.3.3 DVB-T signals (DVB-T in adjacent channel) 18
9 Receiver antenna characteristics 18
9.1 Antennas for terminal category a 18
9.2 Antennas for terminal category b1 18
9.3 Antennas for terminal category b2 and c 19
9.4 External antennas 20
9.4.1 General 20
9.4.2 External antennas for terminal category b2 and c 20
9.4.3 External antenna connector 20
10 Receiver performance 21
10.1 Reference model 21
10.2 Noise model 22
10.3 Degradation criteria 24
10.4 Diversity receivers 25
10.5 DVB-H receivers 26
10.6 Channel models 27
10.6.1 DVB-T Rayleigh channel (P_1) 27
10.6.2 Portable indoor (PI) and outdoor (PO) channels 27
10.6.3 Mobile reception 29

10.7 *C/N* performance 34
10.7.1 *C/N* performance in Gaussian channel 34
10.7.2 *C/N* performance in DVB-T Rayleigh channel (P_1) 34
10.7.3 *C/N* Performance in portable indoor (PI) and portable outdoor (PO) channels 35
10.7.4 DVB-T *C/N* performance in mobile channels for terminal class a 36
10.7.5 DVB-H *C/N* performance in mobile channels 37
10.8 Receiver minimum and maximum signal input levels 38
10.8.1 Noise floor 38
10.8.2 Minimum input levels (sensitivity) 39
10.8.3 Total maximum power for wanted and unwanted signals 39
10.8.4 Maximum input levels for wanted and unwanted signals 39
10.9 Immunity to analogue and/or digital signals in other channels 40
10.9.1 General 40
10.9.2 Interfering signal definitions 41
10.9.3 Selectivity patterns 42
10.9.4 Linearity patterns 42
10.9.5 Immunity to pattern S1 43
10.9.6 Immunity to pattern S2 44
10.9.7 Immunity to pattern L1 45
10.9.8 Immunity to pattern L2 46
10.9.9 Immunity to pattern L3 47
10.9.10 Immunity to pattern L4 48
10.10 Immunity to co-channel interference from analogue TV signals 49
10.11 Guard interval utilization 49
10.11.1 Performance with echo within guard interval 49
10.11.2 Performance with echo outside guard interval 50
10.12 Tolerance to impulse interference 52
10.12.1 General 52
10.12.2 Test patterns 52
10.13 EMC characteristics 54
10.13.1 Terminal category c 54
10.13.2 Terminal category a and b 54
11 Interoperability with other radio systems 54
11.1 Cellular radios 54
11.1.1 General 54
11.1.2 Cellular radio uplink wanted signal interference to DVB-T/H receiver 56
11.1.3 Cellular radio uplink unwanted signal interference to DVB-T/H receiver 57
11.2 DVB-RCT 58
Annex A (informative) Active external antennas and system noise floor 59
Annex B (informative) An example of *C/N*-performance with a practical transmitter 63
Annex C (informative) Multipath reception in a DVB-T system 64

INTERNATIONAL ELECTROTECHNICAL COMMISSION

_____

MOBILE AND PORTABLE DVB-T/H RADIO ACCESS –

Part 1: Interface specification

FOREWORD

1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
5) IEC provides no marking procedure to indicate its approval and cannot be rendered responsible for any equipment declared to be in conformity with an IEC Publication.
6) All users should ensure that they have the latest edition of this publication.
7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 62002-1 has been prepared by technical area 1: Terminals for audio, video and data services and content, of IEC technical committee 100: Audio, video and multimedia systems and equipment.

This second edition cancels and replaces the first edition, published in 2005 and constitutes a technical revision.

The main changes with respect to the previous edition are listed below.

- DVB-H has been included as a part of the main specification.
- All the performance figures have bee revised as new simulation results have been made available as well as new reference receivers for DVB-H have been developed.
- DVB-H now includes all the different MPE-FEC code rates.
- New portable indoor and portable outdoor channel models have been included as well as performance figures for those.
- A new 2x TU-6 mobile SFN test channel has been included.

- A new L4 linearity pattern has been added.
- Dedicated performance figures for DVB-H for S1, S2, L1 to L4 interference patterns have been included.
- A new GSM-interference measurement method has been added.

The text of this standard is based on the following documents:

CDV	Report on voting
100/1289/CDV	100/1381/RVC

Full information on the voting for the approval of this standard can be found in the report on voting indicated in the above table.

This publication has been drafted in accordance with the ISO/IEC Directives, Part 2.

A list of all parts of the IEC 62002 series, under the general title *Mobile and portable DVB-T/H radio access*, can be found on the IEC website.

The committee has decided that the contents of this publication will remain unchanged until the maintenance result date indicated on the IEC web site under "http://webstore.iec.ch" in the data related to the specific publication. At this date, the publication will be

- reconfirmed;
- withdrawn;
- replaced by a revised edition, or
- amended.

A bilingual version of this publication may be issued at a later date.

The contents of the corrigendum of July 2008 have been included in this copy.

MOBILE AND PORTABLE DVB-T/H RADIO ACCESS –

Part 1: Interface specification

1 Scope

This part of IEC 62002 is a radio access specification for mobile, portable and hand-held portable devices capable of receiving DVB-T/H services. It includes informative system aspects as well as specifications for minimum RF-performance. It covers terminals in three main classes, namely integrated car terminals, portable digital TV sets and hand-held portable convergence terminals. Interoperability with integrated cellular radios is also considered. The specification covers the following areas.

- Frequency ranges
- Supported modes
- Definition of receiving conditions
- Definition of the receiver RF-reference model
- Definition of degradation criteria
- Antenna characteristics
- Channel models
- C/N-performance with different channels
- Minimum and maximum input levels
- Immunity to interfering signals
- Definition of an ensemble of interference patterns
- Tolerance to impulse interference
- SFN-performance
- Transmitter minimum performance
- Interoperability of cellular radios
- EMC aspects
