About the IEC
The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications
The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search - webstore.iec.ch/advsearchform
The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, …). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished
Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc
If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch
Discover our powerful search engine and read freely all the publications previews, graphical symbols and the glossary. With a subscription you will always have access to up to date content tailored to your needs.

Electropedia - www.electropedia.org
The world's leading online dictionary on electrotechnology, containing more than 22 500 terminological entries in English and French, with equivalent terms in 25 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

Warning! Make sure that you obtained this publication from an authorized distributor.

CONTENTS

FOREWORD 5
1 Scope 7
2 Normative references 7
3 Terms, definitions, abbreviated terms and symbols 7
3.1 Terms and definitions 7
3.2 Abbreviated terms 7
3.3 Symbols 7
4 General requirements of the operational performance testing 9
4.1 Purpose 9
4.2 Stakeholders 10
4.3 Principles of assessment intervals and data sampling 10
4.4 Data requirements 10
4.5 Operational performance testing methods 11
5 Operational performance testing items 12
5.1 General 12
5.2 General operational performance testing items 12
5.2.1 Actual energy storage capacity 12
5.2.2 Input and output power rating 12
5.2.3 Roundtrip efficiency 12
5.2.4 Auxiliary power consumption 12
5.3 Energy-related operational performance testing items 12
5.3.1 Available hours of an EES system 12
5.3.2 Equivalent operation factor of an EES system 12
5.4 Efficiency-related operational performance testing items 13
5.4.1 Comprehensive efficiency of an EES system 13
5.4.2 Energy loss rate of an EES system 13
5.4.3 Duty cycle roundtrip efficiency 13
5.5 Reliability-related operational performance testing items 13
5.5.1 Planned outage factor of an EES system 13
5.5.2 Unplanned outage factor of an EES system 13
5.5.3 Availability factor of an EES system 13
5.6 Grid-connected operational performance testing items 13
5.6.1 Impact of grid conditions on the performance 13
5.6.2 Active power control test 14
5.6.3 Reactive power control test 14
5.6.4 Primary frequency regulation test 14
5.6.5 Secondary frequency regulation test 14
5.6.6 Grid-connected operation power quality test 14
5.7 Operational performance testing items in specific applications 15
5.7.1 Classification and summary of EES system applications 15
5.7.2 Frequency regulation mode 15
5.7.3 Fluctuation reduction mode 15
5.7.4 Reactive power voltage control mode 15
5.7.5 Power quality management mode 15
5.7.6 Peak shaving/peak shifting mode 16
5.7.7 Renewable firming mode 16
5.7.8 Islanded grid mode 16

5.7.9 Backup power mode 16
6 Operational performance testing methods of EES systems 16
6.1 General 16
6.2 General operational performance testing method 17
6.2.1 Genaral 17
6.2.2 Actual energy storage capacity 18
6.2.3 Input and output power rating 18
6.2.4 Roundtrip efficiency 18
6.2.5 Auxiliary power consumption 19
6.3 Energy-related operational performance testing method 20
6.3.1 General 20
6.3.2 Available hours of an EES system 20
6.3.3 Equivalent operation factor of an EES system 21
6.4 Efficiency-related operational performance testing method 22
6.4.1 General 22
6.4.2 Comprehensive efficiency of an EES system 22
6.4.3 Energy loss rate of an EES system 23
6.4.4 Duty cycle roundtrip efficiency 24
6.5 Reliability-related operational performance testing method 25
6.5.1 General 25
6.5.2 Planned outage factor of an EES system 25
6.5.3 Unplanned outage factor of an EES system 25
6.5.4 Availability factor of an EES system 25
6.6 Grid-connected operational performance testing method 26
6.6.1 General 26
6.6.2 Active power control test 26
6.6.3 Reactive power control test 28
6.6.4 Primary frequency control 30
6.6.5 Secondary frequency control 32
6.6.6 Grid-connected operation power quality test 32
6.7 Operational performance testing method in specific application 32
6.7.1 Genaral 32
6.7.2 Frequency regulation mode 33
6.7.3 Fluctuation reduction mode 33
6.7.4 Reactive power voltage control mode 34
6.7.5 Power quality management mode 34
6.7.6 Peak shaving/peak shifting mode 34
6.7.7 Renewable firming mode 35
6.7.8 Islanded grid mode 36
6.7.9 Backup power mode 36
Annex A (informative) performance indicators of primary concern to major stakeholders 37

INTERNATIONAL ELECTROTECHNICAL COMMISSION

_____

ELECTRICAL ENERGY STORAGE (EES) SYSTEMS –

Part 2-3: Unit parameters and testing methods – Performance assessment tests during site operation

FOREWORD

1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as “IEC Publication(s)”). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
6) All users should ensure that they have the latest edition of this publication.
7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
8) Attention is drawn to the Normative references maycited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
9) IEC draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). IEC takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, IEC had not received notice of (a) patent(s), which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at https://patents.iec.ch. IEC shall not be held responsible for identifying any or all such patent rights.

IEC 62933-2-3 has been prepared by IEC technical committee TC 120: Electrical Energy Storage (EES) systems. It is a Technical Specification.

The text of this Technical Specification is based on the following documents:

Draft	Report on voting
120/392/DTS	120/413/RVDTS

Full information on the voting for its approval can be found in the report on voting indicated in the above table.

The language used for the development of this Technical Specification is English.

This document was drafted in accordance with ISO/IEC Directives, Part 2, and developed in accordance with ISO/IEC Directives, Part 1 and ISO/IEC Directives, IEC Supplement, available at www.iec.ch/members_experts/refdocs. The main document types developed by IEC are described in greater detail at www.iec.ch/publications.

A list of all parts in the IEC 62933 series, published under the general title *Electrical energy storage (EES) systems*, can be found on the IEC website.

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under webstore.iec.ch in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn, or
- revised.

ELECTRICAL ENERGY STORAGE (EES) SYSTEMS –

Part 2-3: Unit parameters and testing methods – Performance assessment tests during site operation

1 Scope

This part of IEC 62933 specifies the unit parameters and testing methods that validate and assess the performance of EES systems after commissioning.

2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

IEC 61000-4-30, *Electromagnetic compatibility (EMC) – Part 4-30: Testing and measurement techniques – Power quality measurement methods*

IEC 62933-2-1:2017*, Electrical energy storage (EES) systems – Part 2-1: Unit parameters and testing methods – General specification*
