Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 207, *Environmental management*, Subcommittee SC 4, *Environmental performance evaluation*.

A list of all parts in the ISO 14030 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.

Introduction

Green debt financing has become an important tool to provide funding to meet growing environmental challenges. For financial and other institutions which offer loans, the designation as “green” can be used to finance projects, assets and supporting expenditures that result in potential environmental benefits such as aligning with global climate goals, protecting the environment and conserving natural resources. For lenders, borrowers and intermediaries, green loans are an attractive option with growing market appeal.

The growth in demand for green investments has also led to concerns over “greenwashing”, i.e. intended or inadvertent misrepresentation of green-related attributes. However, the clear, consistent, robust and transparent assessment, management and reporting of positive and negative impacts can offer confidence and reassurance to investors and other interested parties.

This document expands on the Loan Market Association’s Green Loan Principles[13] by offering specific requirements and guidance for the eligibility of green loans. The intended result is to provide clarity on, and improve the credibility of, green loans. Like ISO 14030-1, this is achieved by setting requirements for the allocation of funds to projects, assets and supporting expenditures and for requiring reporting on actual or expected impacts.

The following elements of the process for issuing and managing a green loan have been drawn from the process defined within ISO 14030-1 and the Green Loan Principles with a view to promoting consistency across debt instruments:

— use of proceeds;

— process for evaluation and selection;

— management of proceeds;

— reporting.

This document also provides specific requirements for lender and borrower responsibilities related to additional documentation, loan refinancing and reporting.

The process for green loans is similar to ISO 14030-1. Both focus on the elements of green financing: the use of proceeds, the process for project evaluation and selection, the management of proceeds, and reporting.

Figure 1 outlines the relationship between the four parts of the ISO 14030 series.

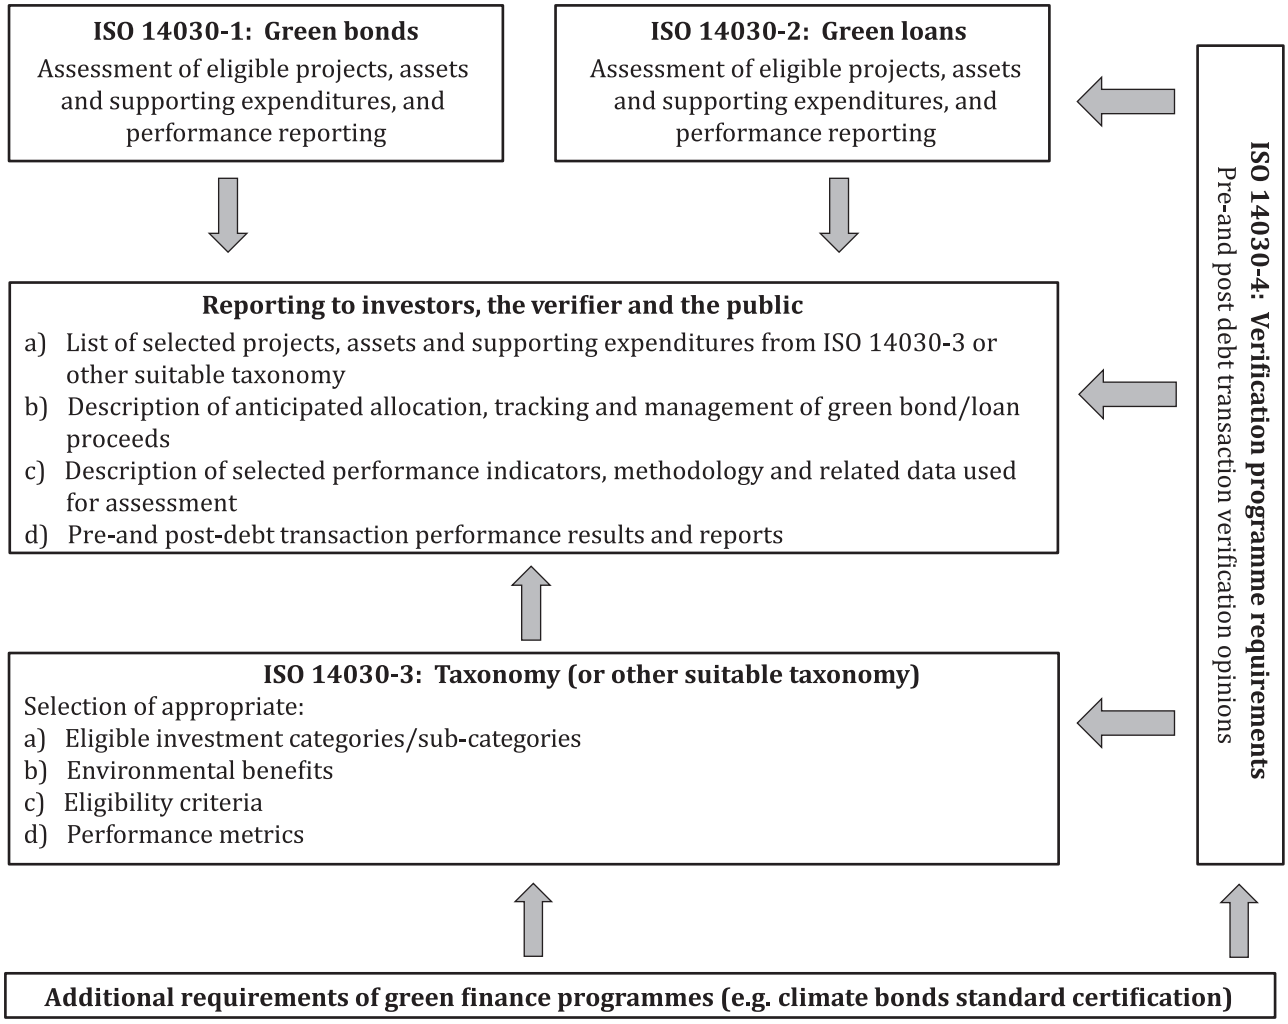

Figure 1 — Relationship between the parts of the ISO 14030 series

In this document:

— “shall” indicates a requirement;

— “should” indicates a recommendation;

— “may” indicates a permission;

— “can” indicates a possibility or a capability.

Information marked “NOTE” is for guidance in understanding or clarifying the associated requirement.

Environmental performance evaluation — Green debt instruments —

Part 2: Process for green loans

1 Scope

This document establishes principles, specifies requirements and gives guidelines:

— for designating as "green" loans which finance eligible projects, assets and supporting expenditures;

— for managing and reporting on the use of proceeds;

— for defining, monitoring and reporting on the environmental impacts;

— for reporting to interested parties;

— for validation and verification.

This document is applicable to any borrower seeking financing by way of a green loan for eligible green projects, assets and supporting expenditures. It is also applicable to lenders.

2 Normative references

There are no normative references in this document.

3 Terms and definitions

For the purposes of this document, the following terms and definitions apply.

ISO and IEC maintain terminology databases for use in standardization at the following addresses:

— ISO Online browsing platform: available at https://www.iso.org/obp

— IEC Electropedia: available at https://www.electropedia.org/

3.1 Terms related to debt instruments

3.1.1
debt instrument
obligation that enables a party to raise funds by promising to repay a *lender* (3.1.6) in accordance with the terms of a contract

3.1.2
green debt instrument
debt instrument (3.1.1) whose net proceeds or an amount equivalent to the net proceeds will be exclusively applied to finance or refinance in part or in full new or existing eligible projects, assets and supporting expenditures

3.1.3
borrower
person or entity who has contracted a *loan* (3.1.4)

© ISO 2021 – All rights reserved

3.1.4
loan
money lent, usually at interest, by one or more *lenders* (3.1.6) to a *borrower* (3.1.3) for a limited period

3.1.5
green loan
loan (3.1.4) whose net proceeds will be exclusively applied to finance or refinance, in part or in full, new or existing eligible projects, assets and supporting expenditures

3.1.6
lender
institution or other entity that makes funds available to a *borrower* (3.1.3), with the expectation that those funds will be repaid

Note 1 to entry: For the purposes of this document, the term "lender" is generic and includes all financial organizations that make loans to individuals, small- and medium-sized enterprises, independently to the investees.

Note 2 to entry: "Lenders" include, without limitation, chartered banks, insurance companies, cooperative banks, crowdfunding companies, revolving credit companies, Islamic banks, individuals and solidarity-based finance providers.

3.1.7
standardized green loan
green loan (3.1.5) provided on standard terms and conditions, typically made available to *borrowers* (3.1.3) with limited size and resources

3.1.8
specialized green loan
green loan (3.1.5) provided on bespoke terms and conditions, where the *borrower* (3.1.3) has the resources to assess the eligibility of a proposed project, asset and supporting expenditure

3.2 Terms related to environmental objectives and performance of projects, assets and supporting expenditures

3.2.1
objective
result to be achieved

[SOURCE: ISO 14001:2015, 3.2.5, modified — The notes to entry have been deleted.]

3.2.2
environment
surroundings in which an organization operates, including air, water, land, natural resources, flora, fauna, humans and their interrelationships

Note 1 to entry: For the purposes of this document, the phrase "in which an organization operates" is understood as "inherent to or affected directly or indirectly by the eligible projects, assets and supporting expenditures of the loan or other debt instruments."

[SOURCE: ISO 14001:2015, 3.2.1, modified — Notes 1 and 2 to entry have been deleted and a new Note 1 to entry has been added.]

3.2.3
environmental objective
objective (3.2.1) set by the *borrower* (3.1.3) or *lender* (3.1.6) that relates to the *environment* (3.2.2)

© ISO 2021 – All rights reserved

3.2.4
environmental performance
performance related to the management of *environmental aspects* (3.2.9)

[SOURCE: ISO 14001:2015, 3.4.11, modified — Note 1 to entry has been deleted.]

3.2.5
impact
change that can be adverse or beneficial

[SOURCE: ISO 15392:2019, 3.17, modified — The words "result of a change or existing condition" have been replaced with "change" and the words "may be adverse, neutral or beneficial" have been replaced with "can be adverse or beneficial".]

3.2.6
environmental impact
impact (3.2.5) to or conservation of the *environment* (3.2.2), wholly or partially resulting from eligible projects, assets and supporting expenditures

3.2.7
outcome
change resulting from the use of the output from a project, asset and supporting expenditure

[SOURCE: ISO 21502:2020, 3.13, modified — "asset and supporting expenditure" has been added.]

3.2.8
natural capital
stock of renewable and non-renewable natural resources (e.g. plants, animals, air, water, soils, minerals) that combine to yield a flow of benefits to people

[SOURCE: Natural Capital Coalition[15]]

3.2.9
environmental aspect
element of an organization's activities or products or services that interacts or can interact with the *environment* (3.2.2)

Note 1 to entry: An environmental aspect can cause (an) *environmental impact(s)* (3.2.6). A significant environmental aspect is one that has or can have one or more significant environmental impact(s).

Note 2 to entry: Significant environmental aspects are determined by the organization applying one or more criteria.

[SOURCE: ISO 14001:2015, 3.2.2]

3.2.10
prevention of pollution
use of *processes* (3.3.3), practices, techniques, materials, products, services or energy to avoid, reduce or control (separately or in combination) the creation, emission or discharge of any type of pollutant or waste, in order to reduce adverse *environmental impacts* (3.2.9)

Note 1 to entry: Prevention of pollution can include source reduction or elimination; process, product or service changes; efficient use of resources; material and energy substitution; reuse; recovery; recycling, reclamation; or treatment.

[SOURCE: ISO 14001:2015, 3.2.7]

© ISO 2021 – All rights reserved

3.3 Terms related to performance evaluation

3.3.1
indicator
quantitative, qualitative or binary variable that can be measured or described, representing the status of operations, management, conditions or impacts

[SOURCE: ISO 14031:2021, 3.4.1]

3.3.2
monitoring
determining the status of a system, a *process* (3.3.3) or an activity

[SOURCE: ISO 14001:2015, 3.4.8, modified — Note 1 to entry has been deleted.]

3.3.3
process
set of interrelated or interacting activities which transforms inputs into outputs

[SOURCE: ISO 14001:2015, 3.3.5, modified — Note 1 to entry has been deleted.]

3.3.4
validation
process (3.3.3) for evaluating the reasonableness of the assumptions, limitations and methods that support a statement about the outcome of future activities

[SOURCE: ISO 14065:2020, 3.3.16]

3.3.5
verification
process (3.3.3) for evaluating a statement of historical data and information to determine if the statement is materially correct and conforms to criteria

[SOURCE: ISO 14064-3:2019, 3.6.2]

3.3.6
verifier
competent and impartial person with responsibility for performing and reporting on a *verification* (3.3.5)

[SOURCE: ISO 14064-3:2019, 3.2.6]

4 Principles

4.1 Transparency

Reports and communication on the environmental aspects are based on an open, comprehensive and understandable presentation of information.

4.2 Accuracy

Bias and uncertainties are reduced as far as is practical.

4.3 Completeness

All relevant information is included.
